BVA®
HYDRAULICS

Industrial Hydraulic Equipment

QuebecHydraulique.com™

The BVA Advantage

BVA Hydraulics was launched in 2003 and is centrally located in the United States in Kansas City, Missouri. BVA is one of the Shinn Fu of America Companies including; Hein-Werner, Omega Lift, Pro-Lift, Blackhawk, Porto-Power, Bone Creeper, Omega Lighting and Save Phace. Shinn Fu was founded in Taiwan in 1971 and began doing business in the United States in 1978. Shinn Fu has over 2,000 Employees worldwide with its headquarters in Taipei, Taiwan.

Confidence Built on Quality

ISO 9001

BVA products are manufactured through an International Quality Assurance System, ISO 9001 which involves consistent observation of administration, management, manufacturing, and production control. Under this system, the related operations are monitored on all aspects from the purchase order to the assembly line and through to shipping the order.

BVA Products comply with the following industry standards

ASME B30.1

The cylinders comply with load testing requirements and / or the safety factor for material yield strength while still functioning properly without oil leakage.

ANSI B40.1

BVA pressure gauges meet the criteria for grade A.

SAE 100

BVA hydraulic hoses comply with the Material Handling Institute's specification of minimum life cycles and minimum burst pressure rating.

BVA Limited Lifetime Warranty

BVA products are warranted to be free of defects in materials and workmanship. Any BVA product that does not conform to specification will be repaired or credited (at BVA's option) at BVA's expense for the life of the product. Contact BVA for disposition of this warranty.

This warranty does not cover ordinary wear and tear, abuse, misuse, alteration, or use of improper fluids or maintenance as determined by BVA and its authorized service centers. All electric motors, gas engines, batteries and other parts or materials sold with or part of BVA products but are separately warranted by another manufacturer, are covered by that manufacturer's warranty and not the BVA Lifetime Warranty. BVA shall not be liable for consequential or incidental damage or loss.

pg 34

Safety Practices

80%

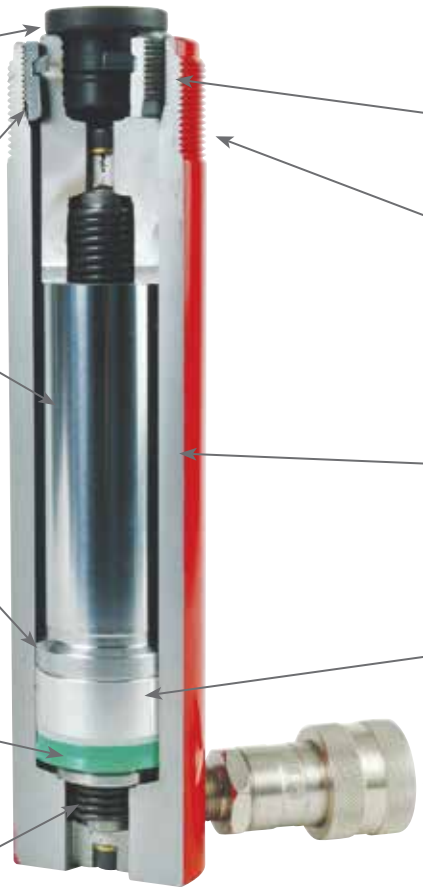

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

pg 92

Heavy duty, heat treated, grooved saddle provides better surface traction during operation

Rod wiper seals out dirt and contamination

Industrial hard chrome plated rod prevents scratching and corrosion

One piece steel rod stopper for extra strength and prevents over travel

Polyurethane cup seal provides optimum performance

Rectangular return spring design eliminates spring breakage and provides quicker retraction

Steel stop ring for rod over travel protection

Collar fixture threads

Cylinders are burnish rolled for smoother finish than honing which reduces scoring and prolongs seal life

One piece high grade alloy bearing for side load protection and long life

High flow ball coupler provides more flow than conventional couplers

Single Acting Cylinders

H Series - General Purpose, Spring Return

Capacity:

2 - 100 Tons‡

Stroke:

0.63 - 14.25 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

1.63 - 32.99 Inches

CE

‡ Larger Tonnages

For tonnages that exceed 100, please refer to our HG Section

pg 18

Single Acting Cylinder H1506 in the collapsed position with CB15 cylinder base for safety.

Single Acting Cylinder H5513 in the collapsed position ready to lift a load

- Collar threads and base mounting holes for fixturing
- Hard chrome plated piston rod protects against corrosion and damage
- Polyurethane U-Cup seals provide a sure seal and long life
- Solid one piece alloy steel body
- One piece aluminum alloy bearing protects against cylinder wall damage
- CH38F high flow coupler with dust cap is standard on most cylinders**

Safety Practices

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

HU Series – Aluminum Cylinders

Aluminum cylinders make a great lightweight alternative being up to 60% lighter than comparable steel models.

Aluminum Single Acting Cylinders

HU Series - General Purpose, Spring Return, Lightweight

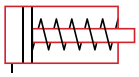

HU7506

HU5006

HU2006

HU7504

Capacity:

20 - 150 Tons

Stroke:

1.97 - 10.00 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

6.85 - 15.73 Inches

CE

- Lightweight aluminum alloy construction
- Up to 60% lighter than comparable tonnage steel cylinders
- Convenient carry handle on 50, 75 and 100 ton models
- Hard anodized aluminum rod provides extra protection against corrosion and wear
- Integral steel protective plate
- Maximum working pressure: 10,000 psi / 700 bar

Aluminum vs. Steel Cylinders

Aluminum cylinders provide a great alternative to the traditional steel cylinder in many applications. Being up to 60% lighter in weight, Aluminum cylinders are highly portable and reduce user fatigue and strain. However, due to the finite properties of Aluminum vs. Steel, these cylinders should NOT be used in high cycle applications. The BVA Aluminum cylinders are designed for a maximum safety rating of 5,000 cycles. Under normal lifting applications this should provide a long service life.

HU5006T

H5506

Aluminum Cylinders

- 60% lighter in weight than steel
- Highly portable and reduces user fatigue
- Not used for high cycle applications
- Under normal conditions, the maximum rated safety cycle life is 5,000 cycles
- Base of the cylinder contains a steel plate*

Steel Cylinders

- Much heavier than aluminum cylinders
- Low portability with heavier cylinders which creates user fatigue and strain
- Will out-perform aluminum cylinders in higher cycle applications
- Can exceed aluminum cylinders maximum safety cycle life of 5,000 cycles.

*The base of the cylinders contain a steel plate with mounting holes that are designed to protect the cylinder from damage and should NOT be used in fixturing applications and ONLY be used to attach larger base mounting plates for lifting stability. They are NOT designed to withstand the full ratings of the cylinders.

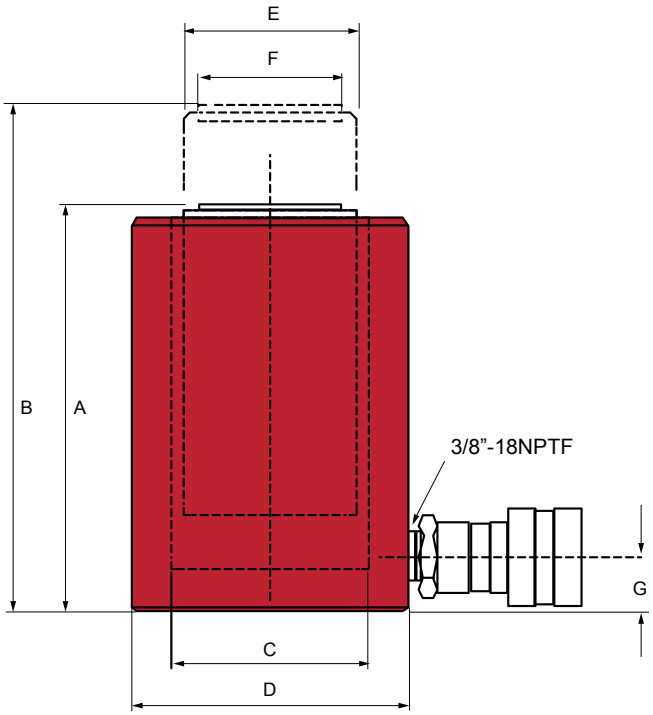

Safety Practices

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

High-Flow Couplers

High-Flow Coupler: CH38F is included on all models (except where specified).

Double Acting Cylinders

HD Series - General Purpose

HD20013

HD3008

Capacity:

10 - 500 Tons

Stroke:

5.90 - 24.00 Inches

Pressure:

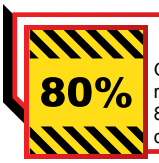

10,000 psi

Min. - Max. Height:

10.56 - 60.13 Inches

CE

- Rod wiper seals out dirt and contamination
- High strength steel construction from gun drilled solid bar
- High flow 3/8″ NPTF female couplers
- One piece high grade alloy bearing for side load protection and long life
- Ideal for pushing and pulling
- Maximum working pressure: 10,000 psi / 700 bar
- Threaded cylinders, removable saddle, thicker cylinder walls
- Retract under hydraulic power for faster operation

Safety Practices

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Clevis and Tangs

Install a clevis or a tang to your double acting cylinder for a pulling application.

pg 34

HD cylinders can be used in pushing and pulling applications. In this photo, we see a HD2506 HD cylinder set up for a pull application using a Rod Clevis cylinder accessory ▶

HD20024

HD2506

With a variety of tonnage and sizes, you can apply our cylinders to a large variety of applications. Custom tonnages and stroke lengths are available upon request.

Relief Valve

All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

Aluminum Double Acting Cylinders

HUD Series - General Purpose, Lightweight

HUD5006

HUD10006

Capacity:

30 - 150 Tons

Stroke:

2 - 13 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

8.30 - 33.80 Inches

Aluminum vs. Steel Cylinders

Aluminum cylinders provide a great alternative to the traditional steel cylinder in multiple applications. Being up to 60% lighter in weight, Aluminum cylinders are highly portable and reduce user fatigue and strain. However, due to the finite properties of Aluminum vs. Steel, these cylinders should NOT be used in high cycle applications. The BVA Aluminum cylinders are designed for a maximum safety rating of 5,000 cycles. Under normal lifting applications this should provide a long service life.

HUD10006

HD7513

Aluminum Cylinders

- 60% lighter in weight than steel
- Highly portable and reduces user fatigue
- Not used for high cycle applications
- Under normal conditions, the maximum rated safety cycle life is 5,000 cycles
- Base of the cylinder contains a steel plate*

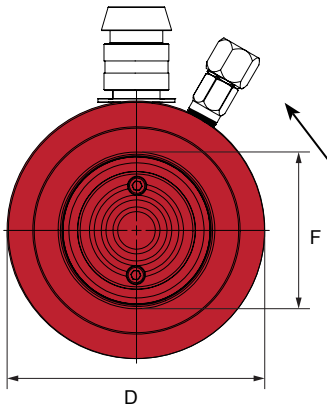

Steel Cylinders

- Much heavier than aluminum cylinders
- Low portability with heavier cylinders which creates user fatigue and strain
- Will out-perform aluminum cylinders in higher cycle applications
- Can exceed aluminums maximum safety cycle life of 5,000 cycles.

CE

* The base of the cylinders contain a Steel plate with mounting holes and is designed to protect the cylinder from damage and should NOT be used in fixturing applications and ONLY be used to attach a larger base mounting plate for lifting stability. They are NOT designed to withstand the full rating of the cylinder.

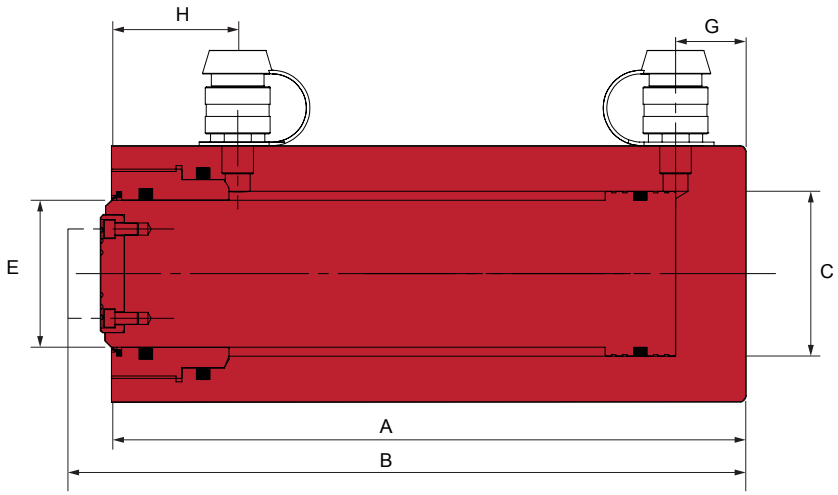

Relief Valve

All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

High-Flow Couplers

High-Flow Coupler: CH38F is included on all models (except where specified).

- Lightweight aluminum alloy construction
- Up to 60% lighter than comparable tonnage steel cylinders
- Convenient carry handle on 50, 75, 100 and 150 ton models
- Hard anodized aluminum rod provides extra protection against corrosion and wear
- Steel protective plate on cylinder base
- Maximum working pressure: 10,000 psi / 700 bar

High Tonnage Single Acting Cylinders

HG series - Heavy Lifting, Load Return

HG10004 *HG15006* *HG20002*

Capacity:

100-1,500 Tons

Stroke:

1.97 - 11.81 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

7.17 - 43.86 Inches

CE

Related Product: Hoses

We offer a variety of hoses, fittings, lengths and materials.

pg 72

Flow Control Valves

Control the speed of your cylinder by adding a flow control valve.

pg 66

- Cylinders are burnish rolled creating a smoother surface than honing.
- Rod wiper seals out dirt and contamination
- Base mounting holes on all models
- High strength steel construction from gun drilled solid bar providing extra combine strength for high tonnage applications
- High flow 3/8” NPTF coupler
- Polyurethane cup seal provides optimum performance
- Industrial hard chrome plated rod helps prevent rust and corrosion
- Maximum working pressure: 10,000 psi / 700 bar
- Custom sizes are available upon request
- Load Return

Gas/Diesel Engine Pumps

These HG cylinders pair up well with a Gas or Diesel Engine pumps. We offer a variety of different flow rates, motor sizes and reservoir sizes. Contact your local BVA dealer for more details.

PG70M3N05

- Will provide 10,000 psi. hydraulic force at remote locations
- Industrial grade 5.5 or 10.2 hp Honda gas engine or 7.3 hp HATZ diesel engine.
- Ideal for applications where electricity isn’t easily accessible.
- Two speed pump designed for rapid cylinder advance
- Gas pump features a sturdy protective roll cage for use in the toughest environments
- Electric start standard on PD80 and optional on PG90

Electric Motor Pumps

These HG cylinders pair up well with Electric Motor pumps. We offer a variety of different flow rates and motor sizes. Contact your local BVA dealer for more details.

PE50W3N03A

- Meets OSHA regulations for sound (80dBA)
- Two speed pump designed for rapid cylinder advance
- Internal filter screens contamination to prevent pump damage
- All units are wired as 120 VAC 60 Hz; Optional wiring includes 50 Hz motors and 240VAC 60Hz
- 100% Duty Cycle TEFC motors
- All hand pendants are wired at 24VAC for safety
- Full load starting capability

High Tonnage Double Acting Cylinders

HDG Series - Heavy Lifting

Capacity:

100-1,500 Tons

Stroke:

1.97 - 11.81 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

7.17 - 43.80 Inches

CE

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

pg 92

Related Product: Hoses

We offer a variety of hoses, fittings, lengths and materials.

pg 72

Flow Control Valves

Control the speed of your cylinder by adding a flow control valve.

pg 66

- Cylinders are burnish rolled creating a smoother finish than honing
- Industrial hard chrome plated rod prevents scratching and corrosion
- Base mounting holes standard on all models
- Rod wiper seals out dirt and contamination
- High strength steel construction from gun drilled solid bar
- High flow 3/8″ NPTF couplers
- Maximum working pressure: 10,000 psi / 700 bar
- Custom sizes are available upon request

Gas/Diesel Engine Pumps

These HDG cylinders pair up well with a Gas or Diesel Engine pumps. We offer a variety of different flow rates, motor sizes and reservoir sizes on our gas/diesel engine pumps. Contact your local BVA dealer for more details.

PG70M4N05

- Gas engine pump will provide 10,000 psi. hydraulic force at remote locations
- Industrial grade 5.5 or 10.2 hp Honda gas engine or 7.3 hp HATZ diesel engine.
- Ideal for applications where electricity isn't easily accessible.
- Two speed pump designed for rapid cylinder advance
- Gas pump features a sturdy protective roll cage for use in the toughest environments
- Optional electric start

Electric Motor Pumps

These HDG cylinders pair up well with Electric Motor pumps. We offer a variety of different flow rates and motor sizes on our electric motor pumps. Contact your local BVA dealer for more details.

PE50W4N03A

- Meets OSHA regulations for sound (80dBA)
- Two speed pump designed for rapid cylinder advance
- Internal filter screens contamination to prevent pump damage
- All units are wired as 120 VAC 60 Hz; Optional wiring includes 50 Hz motors and 240VAC 60Hz
- 100% Duty Cycle TEFC motors
- All hand pendants are wired at 24VAC for safety
- Full load starting capability

Quick Reference Guide

HDG Series

Safety Practices

80%

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Related Product: Gauges

Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need.

pg 69

High-Flow Couplers

High-Flow Coupler: CH38F is included on all models (except where specified).

Safety Check: CVP3-K

Pilot operated check valve kit. Used to hold the load in the event of a pressure loss in the system.

Relief Valve

All double acting cylinders are equipped with a pressure relief valve located next to the retract port. These pressure relief valves help prevent cylinder over pressurization on the return port side of the cylinder.

Optional Tilt-Saddles

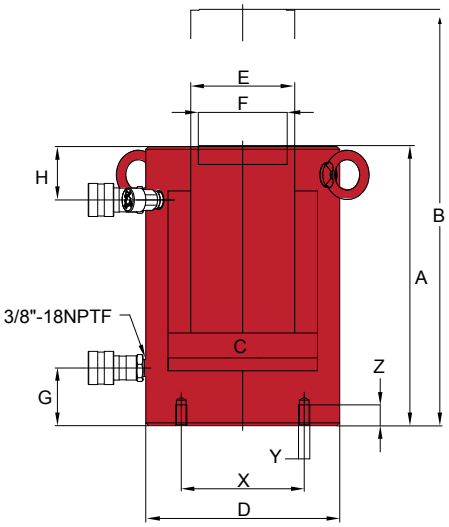

Saddles tilt to a 5% maximum to adjust to the load. View our cylinder accessories page to figure out what saddle best fits these cylinders.

Low Profile Cylinders

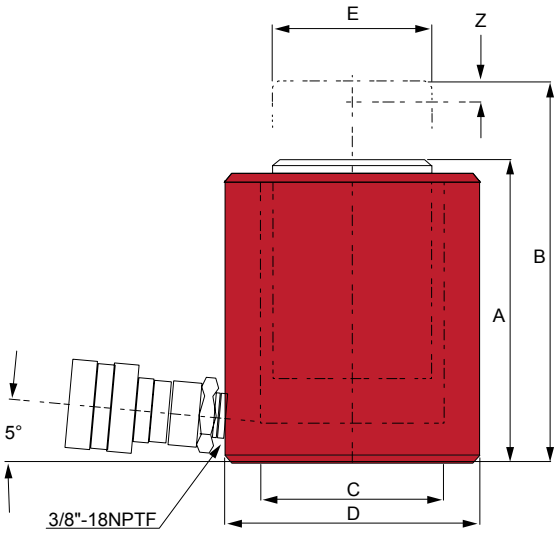

HL Series - Low Clearance Lifting

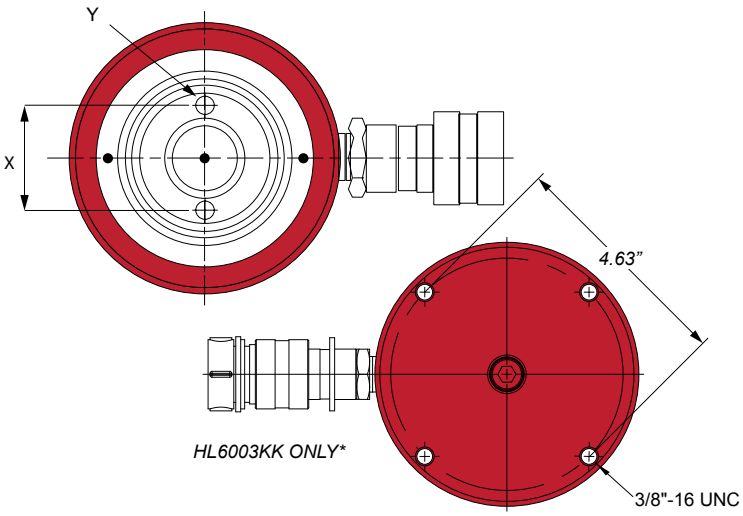

- Compact design for use in confined spaces
- Rod wiper helps seal out dirt and contamination
- Specially designed return spring provides quick retraction and extends the life of the spring
- Hard chrome plated rod helps prevent scratching and corrosion
- Rod end is grooved to reduce load slippage
- Includes high flow coupler and dust cap
- HL1001, HL2002, and HL3002 coupler is tilted 5° for added clearance

Low Profile Cylinders Combo Kit

Low Clearance Lifting

J72101

HL Series

- Compact design for use in confined spaces
- Ideal for pushing applications
- Rod wiper helps seal out dirt and contamination
- Return spring ensures a quick retraction and extends the life of the spring
- Industrial hard chrome plated rod helps prevent scratching and corrosion
- Includes stackable 1″, 2″, and 3″ aluminum adapters that conveniently snap into the base of the Cylinder
- Includes high flow CH38F coupler and dust cap
- Convenient storage case

J72101

80%

Safety Practices

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Related Product: Hoses

We offer a variety of hoses, fittings, lengths and materials.

Lock Nut Cylinders

HLN Series - Heavy Lifting w/ Mechanical Lock Nut

Capacity:

55-300 Tons

Stroke:

1.97 - 11.81 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

6.50 - 33.27 Inches

CE

- Single acting cylinder with mechanical safety lock nut
- Designed to support loads without hydraulic pressure
- Overflow port prevents cylinders from over travel
- Load return
- Solid steel cylinder body
- Electroless nickel plated rod to resist corrosion and rust
- Maximum working pressure: 10,000 psi / 700 bar

Optional Tilt Saddles

SDT55	→	HLN55, HLN100 Cylinders
SDT200	→	HLN150, HLN200 Cylinders

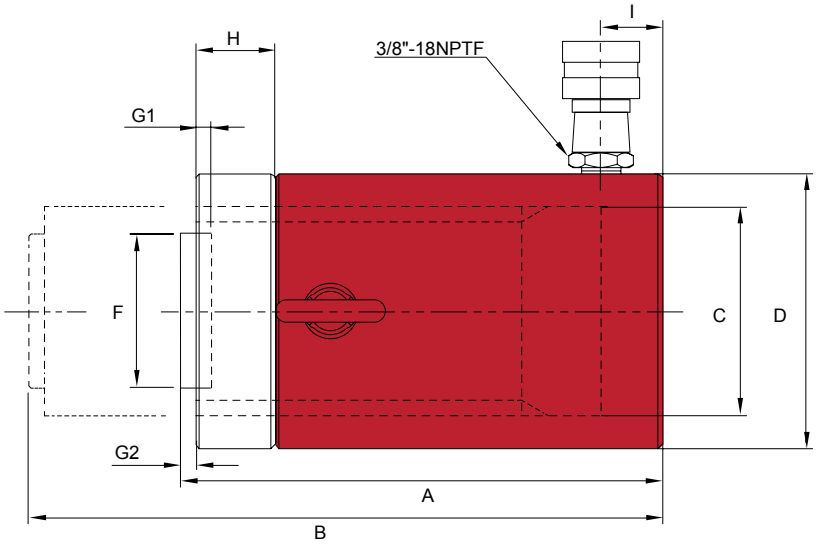

Saddles tilt to a 5° max to adjust to the load.

(42) HLN5508 lock nut cylinders lifting the Jordan Bridge in Chesapeake, VA.

HLN Series

Safety Color Band

BVA Lock nut cylinders are equipped with a yellow safety band. Do not extend the ram beyond this point as it may result in a loss of hydraulic oil and damage to the cylinder and/or load.

Low Profile Lock Nut Cylinders

Low Clearance Lifting w/ Mechanical Lock Nut

HLNF Series

- Single acting cylinder with mechanical safety lock nut
- Designed to support loads without hydraulic pressure
- Low profile for confined spaces
- 5° tilting saddle is standard
- Maximum working pressure: 10,000 psi/700 bar
- Equipped with CH38F high flow coupler
- Load Return

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

pg 92

Safety Color Band

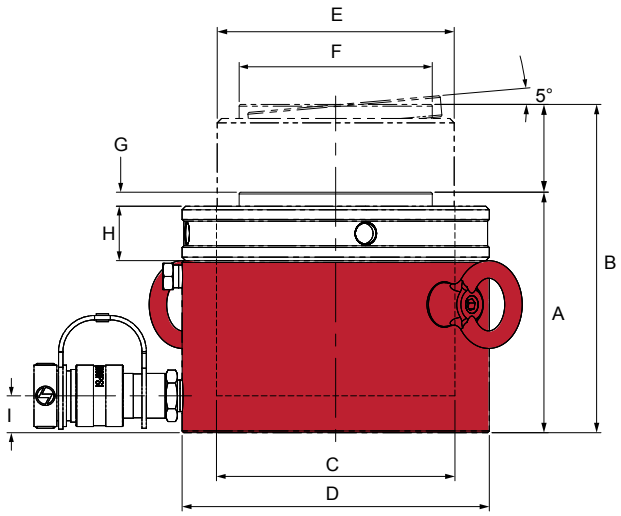

BVA Lock nut cylinders are equipped with a yellow safety band. Do not extend the ram beyond this point as it may result in a loss of hydraulic oil and damage to the cylinder and/or load.

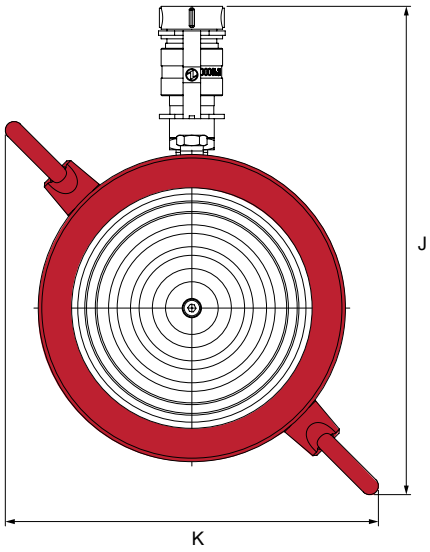

Related Product: Gauges

Reduce the risk of overloading your product by using a gauge. A variety of graduations and types to suit any need.

Hollow Hole Cylinders

HC Series

HC1201T *HC6006T* *HC3002T*

Capacity:

12-100 Tons

Stroke:

0.31 - 6.11 Inches

Max. Operating Pressure:

10,000 psi

Min. - Max. Height:

2.36 - 19.13 Inches

CE

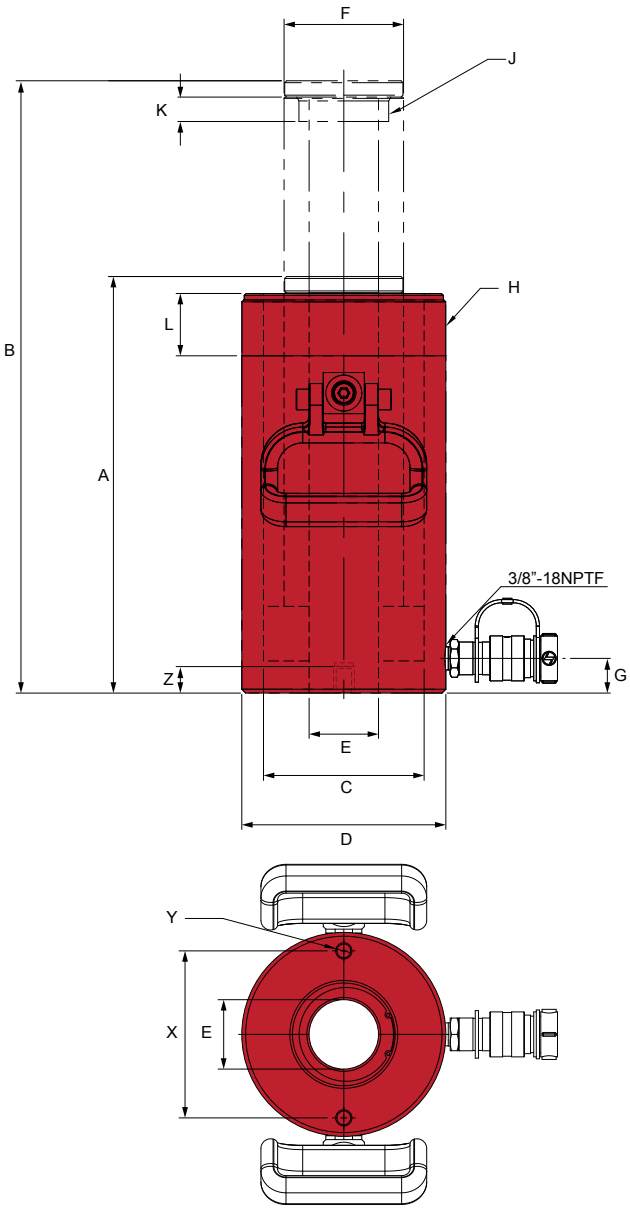

Here is a HC6006T in a pulling application.

- Ideal for pulling and pushing applications
- Heavy duty compression spring
- Dual wipers help prevent contamination
- Collar thread protector
- High flow coupler with dust cap
- XT cylinders do not come with internal rod threads
- 60 and 100 Ton models are equipped with carrying handles

Pull Cylinders

HP Series - High-Tonnage Pulling

- High strength steel construction
- One piece high grade alloy bearing for side load protection and longer life
- Polyurethane cup seal provides optimum performance
- External rod threads and Internal base threads
- Used for pulling and tensioning
- Maximum working pressure: 10,000 psi / 700 bar
- Spring extend return

HP Series

Related Product: Hoses

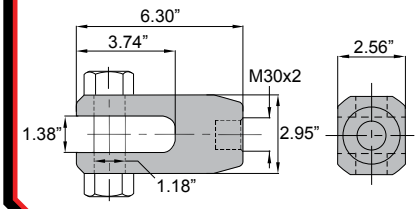

We offer a variety of hoses, fittings, lengths and materials.

Threaded Cylinders

HT Series

- Ideal for frame pulling machines
- Threaded rod and base
- Single acting cylinders with spring return
- Removable threaded Rod adapter used to attach accessories to rod end and base
- Maximum working pressure: 10,000 psi / 700 bar

HT Series

Safety Practices

80%

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

Safety Instructions

Visit our DO'S and DON'TS section to review the best methods of operation. Always be prepared.

Precision Double Acting Cylinders

HPD Series - High-Cycle Fixtured Application

HPD Series

**Note: Precision double acting cylinders do not come with couplers.*

- Provides hydraulic power on both extend and retract
- Designed for high cycle production applications
- High strength steel construction from gun drilled solid bar
- Rod wiper seals keep dirt and contamination out
- Clevis eye attachments are available
- Maximum working pressure: 10,000 psi / 700 bar

Related Product: Hoses

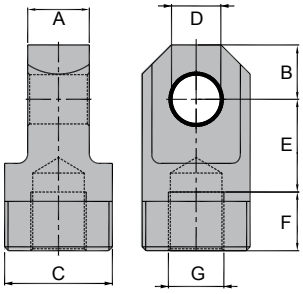

We offer a variety of hoses, fittings, lengths and materials.

pg 92

Product Information

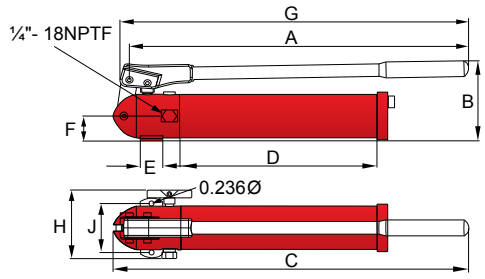

- Metal reservoirs resist cracking
- Internal pressure relief valve for overload protection
- Good for use with cylinders and hydraulic tools or OEM applications
- Two-Speed pumps reduce user fatigue and increase productivity
- P1000AD can be not only be used in the standard horizontal position, but can also be used with the outlet port facing upwards or downwards positions providing more flexibility in operation
- P1000RP comes with a 7/16"-20 return-to-tank port for applications where this is required

Air Pumps

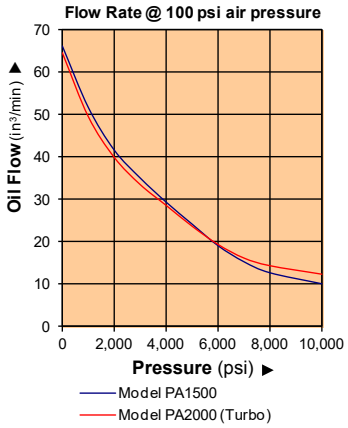

Air Actuated Power

PA Series

Air Consumption= 7.8cfm

Product Information

- Metal reservoirs resist cracking
- US Patent No. 5,946,912, a built in bypass device protects the hydraulic system from over pumping damage
- A compact yet powerful Air Turbo Motor US Patent No. 5,341,723
- Suggested air inlet range: 110-175 psi / 7.6-12.1 bar
- Maximum working pressure: 10,000 psi / 700 Bar

CE

PA1500A Pressure Adjustment

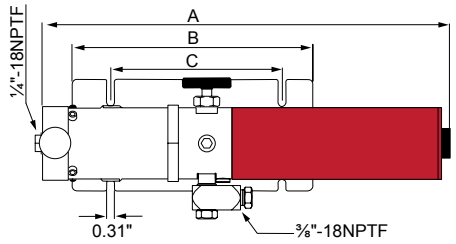

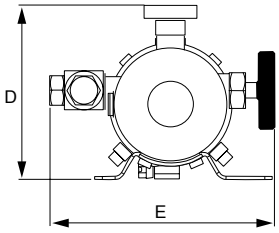

PA1500A Pressure can be adjusted externally from 1,000 to 10,000 psi.

PA3801 and PA7550

FRL-145

Use in compressed air lines upstream of all PA series air/hydraulic pumps to provide clean filtered (5um), lubricated air source to ensure long air motor life. Assembly is equipped with a metal bowl with sight glass and a 0-145 PSIG pressure gauge. 145 PSIG maximum working pressure. 3/8" NPT Ports. Use Class-1 Turbine Oil (ISO VG32).

AD-145

Use in compressed air lines upstream of BVA FRL-145 and all PA series air/hydraulic pumps to remove 99% of free water from the air line to ensure long air motor life. 145 PSIG maximum working pressure. 3/8" NPT Ports.

Electric Pumps

PE30, PE40, PE50 Series
- Single Phase

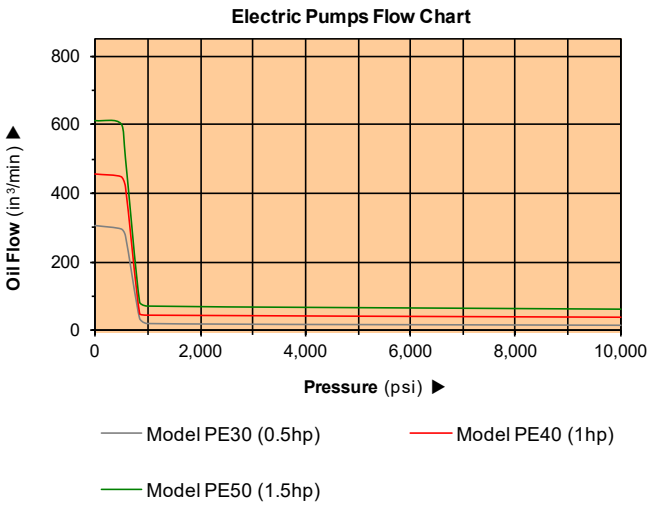

PE50W4N03A

- Meets OSHA regulations for sound (80dBA)
- 2 Stage pumps provide fast run up before the high pressure stage
- Suction strainers screen out contamination to prevent pump damage
- All units are wired as 120 VAC 60 Hz; Optional wiring includes 50 Hz motors and 240 VAC 60 Hz
- 100% Duty Cycle, NEMA 5 Enclosure TEFC motors
- All hand pendants are wired 24 VAC for safety
- Starts under full load

PE Series

Ordering Example

PE30S4L02A-A

After reviewing this model number, we know that the pump has the following specifications:

- Electric power source
- ½ Hp flow group
- Solenoid Valve w/Locking Plate 4W/3P
- 2 gallon reservoir tank
- External Pressure Adjustment Block

PE30S4L02A-A

- All hand pendants are wired with 24 VAC
- Quiet operation meets OSHA regulations (80dBA)
- 2 speed operation allows for faster cylinder advance
- Full load starting capacities
- Internal suction strainer keeps contamination from damaging pump
- Rugged durable design meets the demands of industrial applications
- Precision components to minimize wear and improve overall dependability
- Motors are rated 50/60 Hz for voltage
- Reservoirs equipped with sight level gauges
- PE40 models are standard as 240 VAC 60 Hz
- PE60 Models are standard as 480 VAC 60 Hz

Gas Pumps

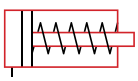

- Gas engine pumps will provide 10,000 psi at remote locations
- Industrial grade 5.5 or 10.2 hp Honda Gas Engine
- Ideal for applications at remote locations
- Two speed pump designed for rapid cylinder advance
- Gas pump features a sturdy protective roll cage for use in the toughest environments
- Manual control valve for use with single or double acting cylinders or tools
- Optional electric start

Diesel Pumps

- Diesel engine pumps will provide 10,000 psi at remote locations
- Industrial grade 7.3 hp HATZ Diesel engine
- Locking solenoid control valve for use with single or double acting cylinders or tools
- Two speed pump designed for rapid cylinder advance
- Pump features a sturdy protective roll cage for use in the toughest environments
- Ideal for application when diesel fuel in remote environments is required
- Comes standard with electric start

PG/PD Series

Ordering Example

PG90S4L10

After reviewing this model number, we know that the pump has the following specifications:

- Gasoline power source
- 10.2 Hp flow group
- Solenoid Valve w/Locking Plate 4W/3P
- 10 gallon reservoir tank

PG90S4L10

Roll Cages

All gas and diesel pumps are equipped with roll cages to prevent any damage that might occur on a job site.

Wireless Controller

PG90 and **PD80** pumps have an optional wireless controller. Visit the gas/diesel pump matrix and pump accessories page for more details.

pg 71

Optional Electric Start

PG90 has an optional electric start.
PD80 comes standard with an electric start.
Refer to the Gas/Diesel Pump Matrix.

Universal Motor Pumps

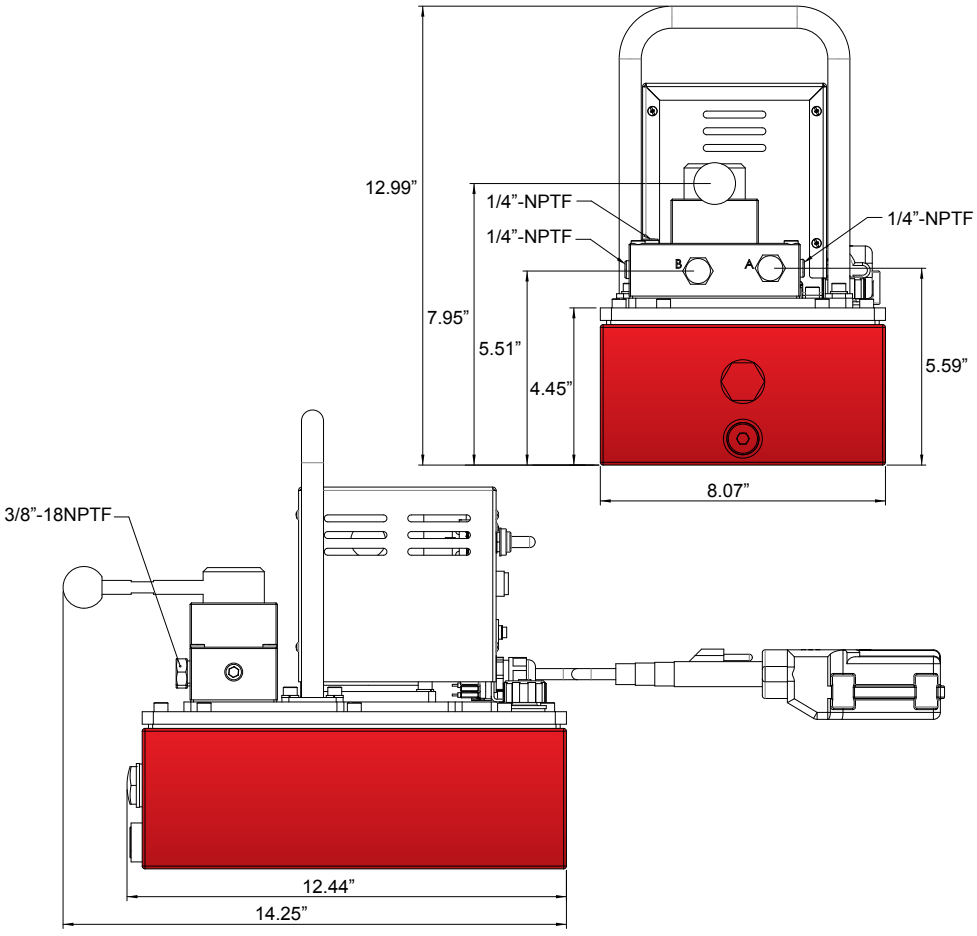

PU Series - Light-Weight Pumps

- Portable, light weight and compact design
- Universal Motor, starts under full load and is available in either 120VAC 50/60 HZ or 240VAC 50/60HZ
- 10ft 24 VAC pendant control for safety
- Weighs only 37 lbs. with oil
- External pressure adjustment is available
- Designed for intermittent duty operation
- Gauge port on control valve
- 1 Gallon Reservoir

PU20DMP01B

PU20M4N01B

Hydraulic Gear Pullers

5, 10, 15, 25, 50 & 100 Ton Hydraulic Gear Pullers come with a safety cage design help keep the jaws tight to the gear and prevent slippage that can cause injury. Pair these with BVA's PU20M3N01B Lightweight e-pump for portability.

pg 83

Hydraulic Nut Splitters

Available in 3 models, each nut splitter can split a wide range of nut sizes thereby reducing the number of splitters needed. The BVA PU20DMP01B dump style pump works well with these splitters

pg 83

Flange Spreaders

BVA's Pin Type Flange Spreaders are available in both 5 & 10 Ton models and well suited for most environments. For portability and speed the PU20M3N01B would be an ideal choice.

pg 81

HGP-1 Pump Kit

HGP-1 Pump Kit contains: PU20M3N01B, CF3814, GW2514, CS3838C, and CH38M

CVC3

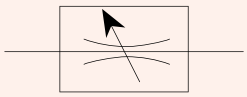

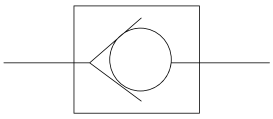

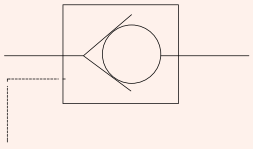

CVP3

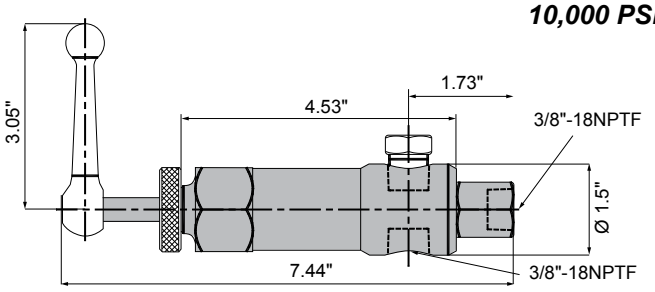

Valve Type	Model Number	Ports	Applications	Hydraulic Symbol
Needle Valve	CVN1	¼"-18NPTF	Controls cylinder speed and acts as temporary shut-off valve for load holding.	
	CVN3	⅜"-18NPTF		
Check Valve	CVC3	⅜"-18NPTF	Allows flow in one direction only.	
Pilot Operated Check Valve	CVP3	⅜"-18NPTF	Mounted in line to a cylinder which will hold pressure in the event of pressure loss in the system. Most often used on double-acting cylinders with pilot port, receiving pressure from a tee off of the cylinder retracting line. Pilot pressure ratio 15% or 6.5:1	

Flow Control Valves

10,000 PSI Rated

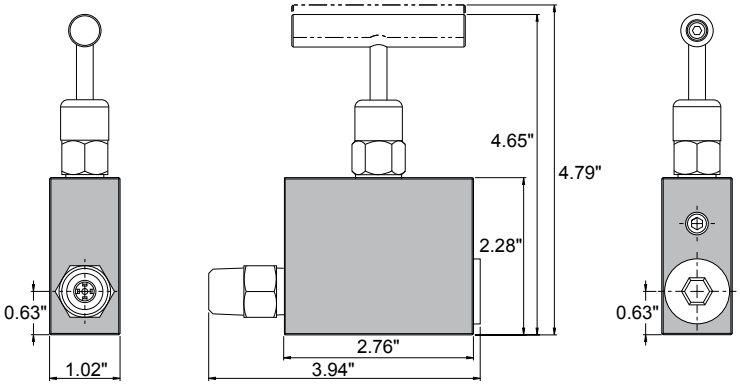

CVR3

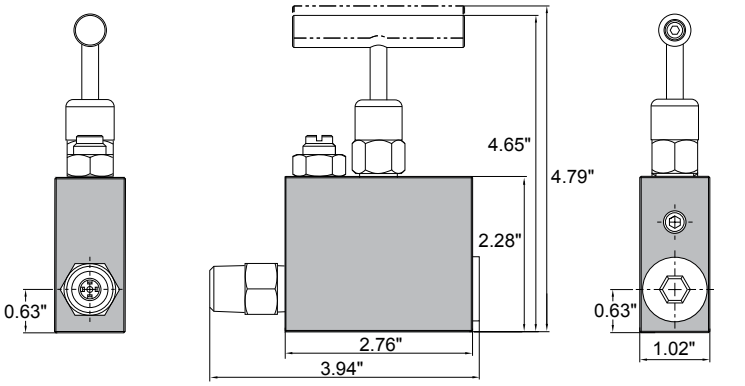

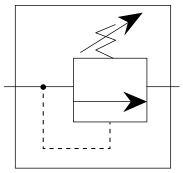

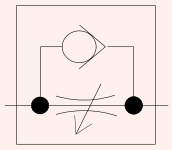

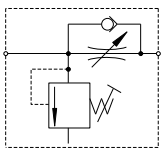

CVM3

CVMS3

Valve Type	Model Number	Ports	Applications	Hydraulic Symbol
Pressure Relief Valve	CVR3	⅜"-18NPTF	Controls pressure developed by the pump in hydraulic loop. By-pass occurs when preset pressure reaches 0-10,000 PSI. Turns clockwise to increase pressure, counter-clockwise to decrease.	
Manual Operated Check Valve	CVM3	⅜"-18NPTF	Mounted in line to a cylinder and will hold pressure in the cylinder in the event of pressure loss in the system. Pressure is manually released.	
	CVMS3	⅜"-18NPTF	Mounted in line to a cylinder and will hold pressure in the cylinder in the event of pressure loss in the system. This model is equipped with high-pressure bypass. Pressure is manually released.

Foot Pedals

Single or Double

FP1

FP2

- Hands free pump operation
- Can be used with all pumps equipped with solenoid valves

Foot controls with 10' cord. This option replaces the hand controls on solenoid equipped models.

Wireless Hand Held Control

WR12K

WR12K

- Allows for increased mobility and safety
- Nominal range of 325 feet (greater w/ unobstructed line of sight)
- Batteries last 100 hours with continuous key press (2 AAA batteries)
- For hands free pump operation
- Contact your local BVA dealer for further information

External Pressure Adjustment

Sandwich Mounted

Model Number	Pressure Adj. Range (psi)	Interval (psi)	Suitable Model
PW-AS1	1,000 ~ 10,000	50	PE Series, 1 Gal. Reservoir
PW-AS2			PE Series, 2+ Gal. Reservoir
PW-AS3			PU20 Series Pump
PW-AS4			PU20DMP Series

PW-AS1

- Pressure can be adjusted externally (1,000-10,000 psi)
- Works with single and double acting cylinders

CMR2

Pump Mounted Manifold Block

CMR2

- Converts BVA pumps with mounted valves for use with remote mounted valves
- Comes with 4 mounting bolts

Pressure Switch

CVS1

- Automatically shuts off electric pump when predetermined system pressure is reached

Model Number	Adjustable Pressure Range	Electrical Rating	Port Size	Weight (lbs)
CVS1	1,000~10,150 psi	15 amp @ 250V max	¼"-18NPTF	1.32

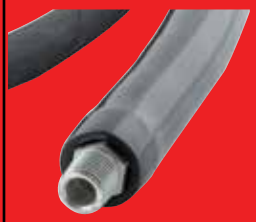

CVS1

Hydraulic Hoses

Rubber or Thermoplastic

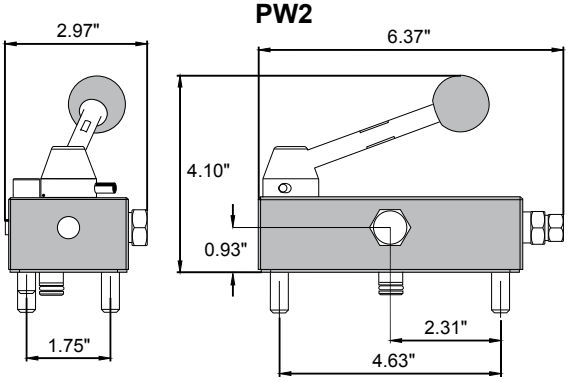

- All hoses are designed with a Maximum Working Pressure of 10,000 psi
- Heavy Duty Rubber Hoses are made with 2 layers of steel braids and comply with the Material Handling Institutes IJ-100 standard for hoses and carries a 2:1 safety factor
- Thermoplastic Hoses are made with 2 layers of steel braids with wrapped in a Polyurethane jacket and carries a 4:1 safety factor

25 Ton Shop Press Accessories

CS25 includes:
- Rod forcing cap
- V push adapter
- Threaded adapter
- ¾″ push adapter
- 1″ push adapter
- Arbor plates (in pairs)
- Bearing separator
- Single acting presses only

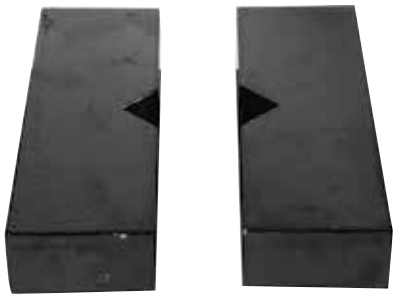

55 Ton Shop Press Accessories

CS55 includes:
- Rod forcing cap
- Threaded adapter
- 1½″ push adapter
- 1¼″ push adapter
- V push adapter
- Arbor plates (in pairs)
- Single acting presses only

CS55D includes:
- Same parts as CS55
- Double acting presses only

100 Ton Shop Press Accessory

AP100 includes:
- Arbor plates (in pairs)

Press Guards

Add a barrier layer between the operator and the work for added safety. Press guards help keep hands out of work area and shields flying debris from being ejected from the press and prevents them from becoming a hazard.

- Sturdy construction
- Fits all types of shop presses (single and double acting)

Model Number	Capacity (tons)	Shop Press Compatibility
SPG25	25	All Manual, Electric and Air 25 Tons Presses (Single and Double Acting)
SPG100	55 & 100	All Manual, Electric and Air 55 and 100 Tons Presses (Single and Double Acting)

Flange Spreader

Pin-Type

SP3-3814

This combination kit works well with our Flange Spreader. See our combo section for more details.

SP5-3814

This combination kit works well with our Flange Spreader. See our combo section for more details.

- Designed for heavy duty industrial environment
- Adjustable jaw width for a wide range of applications and ease of use
- Spare wedge attachment comes standard

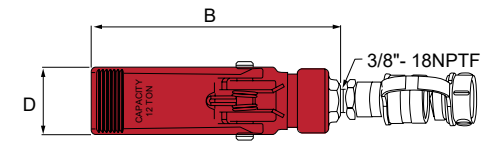

Capacity (tons)	Model Number	Stroke (in.)	Oil Capacity (in^3)	Maximum Flange Thickness (in.)
5	HFS05	1.00	1.00	2 X 2.3
10	HFS10	2.01	4.50	2 X 3.6

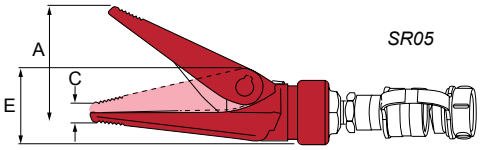

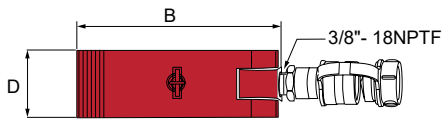

Spreaders

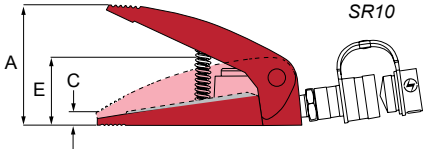

Duck Bill Spreader

- Designed to work in confined working spaces
- Ideal for wedging, prying, and opening
- High strength forged steel
- Spring return for easy operation

Cylinder Capacity (tons)	Model Number	Cylinder Effective Area (in^2)	Oil Capacity (in^3)	Dimensions (in)					Weight (lbs)
				A	B	C	D	E	
0.5	SR05	1.22	0.58	3.54	7.57	0.51	2.05	2.36	4.8

125	HVSP125	2.13”	0.607	3.63	54.0

SP5-3814

This combination kit works well with this product. See our combo section for more details.

80%

Safety Practices

Good industry practice recommends not exceeding 80% of maximum rated capacities of all our products.

50 Ton Cylinder w/ Base & Needle Valve

Hydraulic Truck Jack

JU506

- Aluminum Cylinder
- Anodized ram with carry handle
- Shutoff valve
- High/low temp functionality
- CH38F 3/8”-18NPTF high flow female coupler
- 50 Ton @ 9,091 PSI

Cylinder Capacity (tons)	Model Number	Collapsed Height (in)	Extended Height (in)	Stroke (in)	Weight (lbs)
50	JU506	11.6	17.6	6.0	28.0

Hydraulic Bench Vise

5 Ton Holding Force

- Hands free operation with foot pump control
- Air control valve for variable speed and added safety
- Cast steel construction 52,000 PSI tensile strength
- Hydraulic pressure closes jaws, spring return opens jaws

HFS10

Safety Instructions

Visit our DO’S and DON’TS section to review the best methods of operation. Always be prepared.

pg 92

HGP-1

This combination kit will work well with the hydraulic gear pullers. See our combo section for more details.

Mechanical Gear Pullers

2, 5, 7 Tons

- Able to use 2 or 3 jaws
- Reversible ratchet jaws
- Forged, heat treated high quality steel
- Designed for heavy duty industrial environment
- Adjustable jaw width for a wide range of applications for ease of use
- Easily transportable

Capacity (Ton)	Model Number	Maximum Spread (in)	Maximum Reach (in)	Screw Length (in)
2	MGP02	3-1/4”	2-5/8”	4-1/2”
5	MGP05	5”	4”	8-1/4”
7	MGP07	10”	10”	12”

Hydraulic Nut Splitter w/ Case

Compact and Heavy Duty

- Spacers included
- Straight chisel with a 60/40 angle, and works on all type of materials, including stainless steel
- Chisel can be re-sharpened multiple times
- Comes with a padded tool box to hold the head, cylinder, tips and spacers

Capacity (tons)	Model Number	Nut Size Capacity ATF	Stud Dimension	Weight (lbs)
25	HNS105	0.625” - 1.4375”	0.4375” - 0.875”	20.0

Rail Car Jack, JDR80, lifting the back of a rail car for the operator to start maintenance on the car's wheels.

Rail Car Jack

Double Acting Alum. Cylinder

- High strength aluminum construction suitable for rough working environments.
- Specially designed saddle
- Rod wiper seals out dirt and contamination
- Connect under pressure flush face quick couplers with pressure relief feature for ease of installation and/or removal
- Max. working pressure: 4200 PSI / 290 Bar

** When extension tubes and/or offset attachments are used, the capacity is reduced.*

Lifting Bags

Aramid Reinforced

A lifting bag raising the axle of this train car for maintenance

Lifting bags are useful for many different types of applications

- High pressure air lifting bags require only 1” clearance and can lift up to 86 tons
- 3 or 4 layers of Aramid Fiber on both sides of the bag to create a lifting bag unequaled in strength and durability
- Made in the USA and is ISO 9001/2008 and CE Certified
- Product replacement 3 year unconditional warranty
- Marked with a distinct “bulls eye with tonnage rating”
- Conical, interlocking surface to limit slippage and aid in stacking
- Each bag has either molded carry handles and/or tabs/eyelets
- Each Bag comes with a LB-ACVC Shut-Off valve w safety coupler

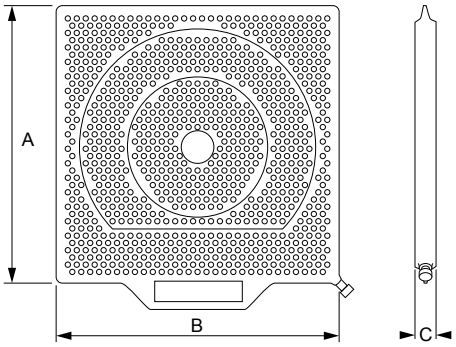

Made in the U.S.A.

All lifting bags are made in the USA and meet ISO 9001/2008 and CE certification.

Manual Bottle Jacks

12-50 Ton

- Hydraulic system is protected from internal damage by a patented by-pass mechanism (U.S. Patent No.5,946,912)
- Machined and polished cylinders with die-cut threads provide non-abrasive leak-free performance
- Fabricated from hard-cast steel with heat-treated critical stress areas
- Unique cross-type forged release valve assures positive load control
- A wide, rugged base provides stability and strength

Air/Manual Bottle Jacks

12-100 Ton

- Air operation reduces operator fatigue and increases speed
- A compact/powerful air turbo motor (U.S. Patent No. 5,341,723) is equipped to raise the load to the desired height efficiently, effortlessly, and safely
- Hydraulic system is protected from internal damage by a patented by-pass mechanism (U.S. Patent No.5,946,912)
- Versatile "Quick Connector" design provides easy removal of the air hose from the air motor, allowing compact storage or remote operation

Safety Instructions

Industry Safety Standards

General

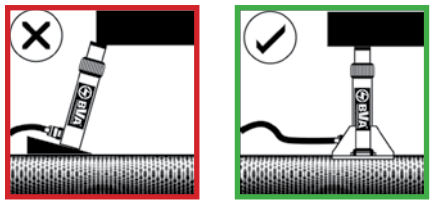

Do not override the factory setting of relief valves. Always use a gauge to check system pressure.

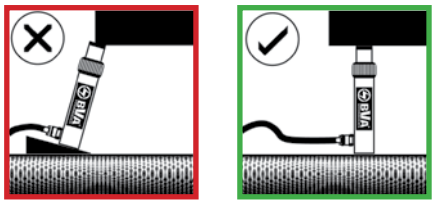

Safety Instructions

- Read and understand all printed materials provided with and on this cylinder
- Do not exceed rated capacities
- Use only on hard level surface capable of sustaining the load
- Do not connect actuators to pumps with higher pressure ratings
- Always inspect hoses and connections for damage prior to use
- Keep hands and feet clear of work area
- LIFTING DEVICE ONLY! Immediately after lifting, support the load with appropriate means
- Use only manufacturer approved hydraulic fluid
- A flow-restricting component shall not be present between the relief valve and the tank
- No alterations shall be made to this cylinder
- Failure to heed these markings may result in injury and/or property damage
- Each double-acting cylinder shall be fitted with a relief valve on the retract circuit, which bleeds off the smaller effective area of the cylinder

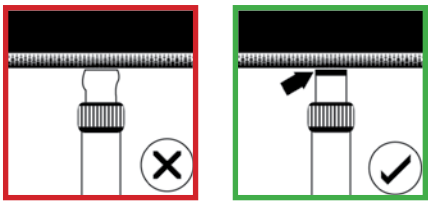

Cylinders

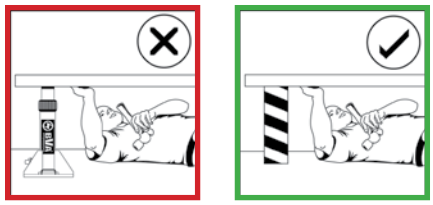

Provide a solid support for the entire cylinder base area. Use cylinder base attachment for more stability.

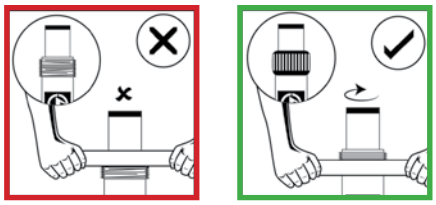

The entire cylinder saddle must be in contact with the load. Movement of the cylinder must be parallel with the movement of the load.

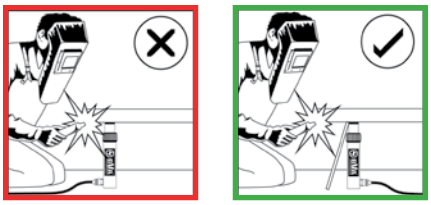

Do not use cylinder without saddle. This will cause rod to “mushroom” Saddles distribute load evenly on the rod.

As with jacks, never place any part of your body under the load. Load must be on cribbing before venturing under.

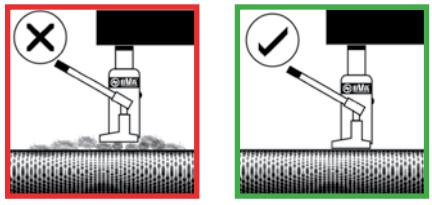

Always protect cylinder threads for use with attachments.

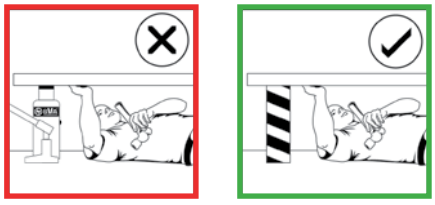

Keep hydraulic equipment away from open fire and temperatures above 150°F (65°C).

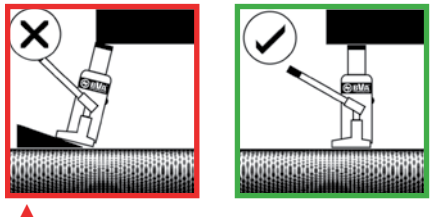

Jacks

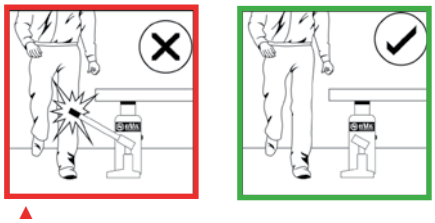

Provide a level and solid support for the entire jack base area.

Never place any part of your body under the load. Ensure the load is solidly supported before venturing under.

The entire jack saddle must be in contact with load. Movement of the load must be in the same direction as jack rod.

Remove the jack handle when not in use.

80% Rule

Good industry practice recommends not exceeding 80% of maximum rated capacities.

- Use only on hard, level surfaces capable of sustaining the load.
- Immediately after lifting, support the load with appropriate means
- Failure to heed these warnings may result in personal injury as well as property damage.

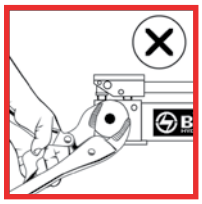

Hydraulic Pump Safety Instructions

- *READ AND UNDERSTAND ALL WARNINGS, INSTRUCTIONS AND OWNER'S MANUAL INFORMATION BEFORE ATTEMPTING TO USE THIS EQUIPMENT*
- Burst hazard exists if hose or connection pressure exceeds rated pressure.
- Do not exceed the rated capacity of this device. Monitor pressure and load at all times.
- Verify load with calibrated load cell and indicator, accurate pressure gauge or equivalent devices.
- Inspect hoses and connections for damage prior to use. Never attempt to grasp a leaking pressurized hose.
- Release the hydraulic pressure before disconnecting hoses or couplers, and before servicing the pump or accessory.
- Immediately after lifting, support the load with appropriate means. Never rely on hydraulic pressure to support a load.
- Wear protective clothing and eye protection that meets ANSI Z87.1 and OSHA standards when operating this equipment.
- Ensure that the chosen application is stable to work on and around.
- Do not subject the pump and its components to shock loads.
- Do not connect to application which can return more oil to the reservoir than the pump reservoir can hold.
- Ensure that the rated pressure of all applications and fittings be equal to or greater than the rated pressure of this pump.
- Keep hydraulic equipment away from flames and heat.
- No alterations shall be made to this device.
- Failure to heed these warnings may result in personal injury as well as property damage.

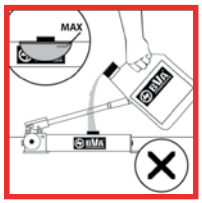

Pumps

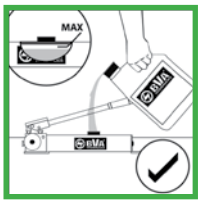

Do not use handle extender. Hand pumps should be easy to operate when used correctly.

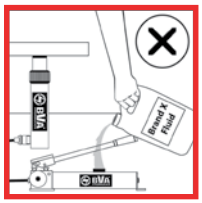

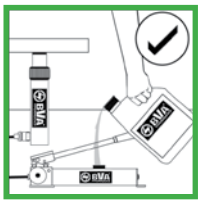

Close release valve finger tight. Using force will damage the valve.

Fill pump only to recommended level. Fill only when connected cylinder is fully retracted.

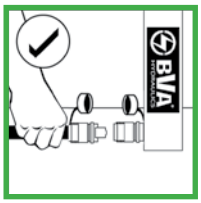

Use only genuine BVA hydraulic oil. The wrong fluid can destroy your seals and pump and will render your warranty null and void.

Electric Pump Safety Instructions

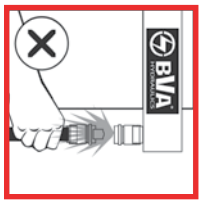

TO AVOID ELECTROCUTION HAZARD:

- Owner/Operator must read, understand and follow all printed material provided with this device before use.
- Connect ONLY to properly grounded electrical source. Connect to GFI outlet ONLY! For use in dry locations.
- Avoid the use of extension cords. If used, extension cord lengths up to 25 ft shall be SJT-14X3 or heavier. For cords up to 50 ft, use SJT-12X3 or heavier.
- For extension cord lengths up to 100 ft, use SJT-10X3 or heavier. NEVER use a 3 prong adapter.
- Do not operate this device in an explosive atmosphere or in the presence of conductive liquids.

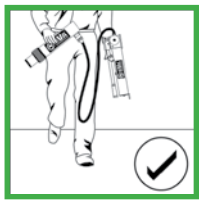

Hoses and Couplers

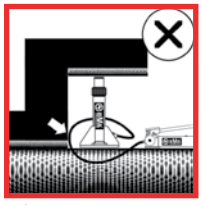

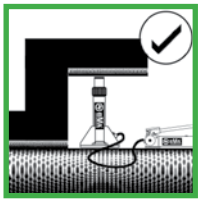

Clean both coupler parts before connecting. Use dust caps when coupler parts are not connected.

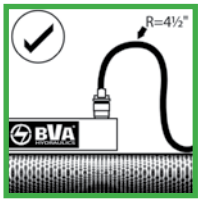

Detach cylinder only when fully retracted or use shut-off valves or safety valves to lock-in cylinder pressure.

Don't lift hydraulic equipment by the hoses.

Keep hoses away from the area beneath loads.

Do not kink hoses. Bending radius should be at least 4½". Do not drive over or drop heavy objects on the hoses.

Maintaining Your Equipment

Ensure a longer life span of your equipment

Hydraulic Fluids

- Use only ISO 46 BVA Hydraulic Oil P/N's; F01 (1 gal) or F55 (55 gal) for pumps and cylinders.
- Viscosity @ 100 deg F 234 (S.U.S.); Viscosity @210 deg F=53 (S.U.S.); ASTM Grade 215; Flash Point 356 deg F; Pour Point -49 deg F, API Gravity =30.8.

Air Line Lubricants

- Use Class 1 Turbine Oil (ISO VG32) for Air Line Lubricant

Hydraulic and Pneumatic Filtration

- Hydraulic fluid must be kept clean, cool and free of water.
- Use Hydraulic Filtration to provide fluid which meets ISO 17/15/12 cleanliness levels.
- Air Line Filtration for solid particulate contamination removal: Use BVA P/N; FRL-145, 5uM Pneumatic Filter.
- Air Line Water Removal; Use BVA P/N; AD-145, Ambient Dryer.

Proper Operation of Equipment

- Refer to individual Product Owner's Manuals and BVA Catalogs for; general information, specifications, safety, set up, operation, maintenance, trouble shooting, storage and warnings for all BVA products.

Formulas

Key to Measurements			
Weight:		**Length**	
1 pound (lb.)	=0.4536 kg	1 in	=25.4 mm
1 kg	=2.205 lbs	1 mm	=0.039 in
1 ton (short, US)	=2,000 lbs	1 in²	=6.452 cm²
1 ton (metric)	=2,205 lbs	1 cm²	=0.155 in²
Volume:		**Pressure:**	
1 in³	=16.387 cm³	1 psi (lb/in²)	=0.69 bar
1 cm³	=0.061 in³	1 bar	=14.5 psi
1 liter	=61.02 in³	1 kPa	=0.145 psi
	=0.264 gal(US)		
1 gal (US, liquid)	=3.785 liter	**Temperature:**	
	=231 in³	0°F	=(0°C x 1.8) + 32
	=3,785 cm³	0°C	=(0°F - 32) ÷ 1.8

Cylinder Rod Speed

Formula → $V = \frac{A}{Q} \times 60$

Cylinder Rod Speed (sec/in) = $\frac{\textit{Cylinder Effective Area (in}^2\textit{)}}{\textit{Pump Flow Rate (in}^3\textit{/min)}} \times \frac{\textit{60 (sec)}}{\textit{1}}$

Force

Formula → F = P × A

Force (lbs) = Hydraulic Working Pressure (lb/in²) × Cylinder Effective Area (in²)

Cylinder Oil Capacity

Formula → C = A × L

Oil Capacity (in³) = Cylinder Effective Area (in²) × Cylinder Stroke (in)

¼" Hose Oil Capacity

Formula → C = 0.5892 × H

Oil Capacity (in³) = 0.5892 × Length of Hose (ft)

⅜" Hose Oil Capacity

Formula → C = 1.3608 × H

Oil Capacity (in³) = 1.3608 × Length of Hose (ft)

Cylinder Effective Area

Formula → $A = \pi \times \frac{D^2}{4}$

Cylinder Effective Area = $\pi \times \frac{\textit{(Cylinder Bore Diameter)}^2}{4}$

π = 3.14159265359
