INTRODUCTION

HOLMBURY HISTORY

The Holmbury Group is a family run hydraulics company with their head office located in Tonbridge, United Kingdom. Holmbury was established in 1982 by David French and quickly became recognized for their high quality and reliable products. The company is best known for its innovative flat face coupler design, launched in 1984, which became the preferred quick release coupler solution for many heavy construction equipment OEMs. The flat face design prevents the inclusion of air and contaminants, while preventing fluid loss during disconnection.

Today Holmbury is a global provider of hydraulic quick release couplers, valves and other hydraulic components. In 2003, driven by the need to respond rapidly to worldwide customer demand, Holmbury set up their North American operation, now located in Eastlake, Ohio. Holmbury continues to expand globally, providing customers with an ever increasing range of hydraulic system solutions.

WHY CHOOSE HOLMBURY

Design and Engineering

Holmbury's products are designed by engineers with years of experience, insight and know-how. Holmbury also maintains strict control of each manufacturing function, optimizing quality at each step along the process, meeting even the most demanding customer specifications. Holmbury utilizes the advantages of global manufacturing expertise to provide customers with timely, precise and cost-effective manufacturing capabilities.

Quality Certifications

All Holmbury products are subject to rigorous laboratory and field testing, and each product is certified in conformity to strict certification standards. Holmbury is an ISO 9001-2008 certified company.

Delivery

Holmbury is dedicated to supplying quality products in the shortest possible time frame. It does so by utilizing fully automated systems that co-ordinate and track production and evaluate performance.

SELECTION LIENS RAPIDES / QUICK LINKS

Flat face couplings, including Holmbury's flagship HQ series, are renowned for high performance and easy wipe clean faces. Minimal fluid loss on disconnection. Minimal air or contaminant inclusion during connection. Safety locking sleeves included on most variants. The choice of many global OEM's.

HQ SERIES

Flat face couplers made to the ISO 16028 Standard

INTRODUCTION

The HQ Series flat face couplers are Holmbury's flagship products, known globally for their leak free performance in high pressure pulse, hammer circuits and many other applications. Preferred choice for many global OEMs.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals (Viton seals available)
- Also available in AISI 316 stainless steel (See HSS Series)

FEATURES

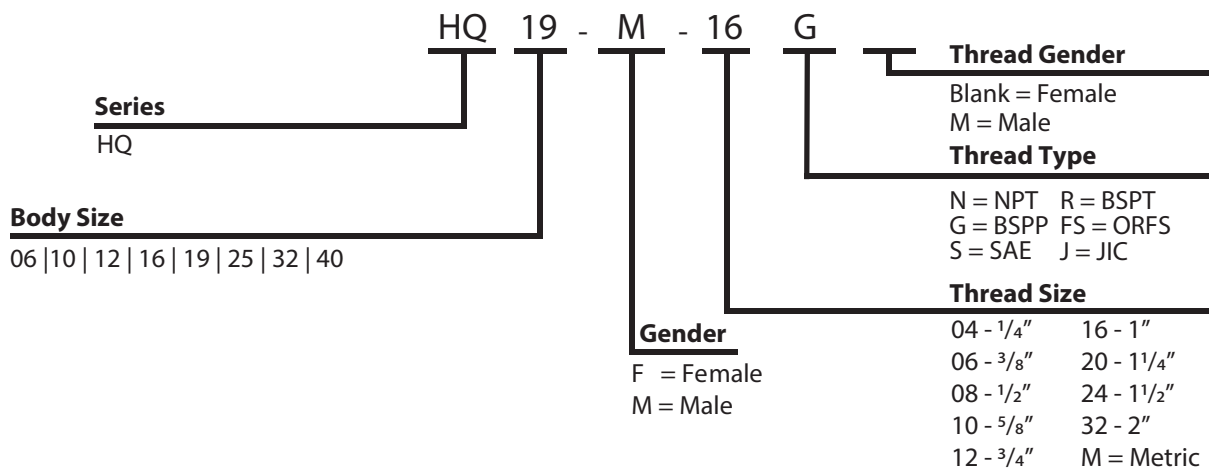

- Safety locking sleeve fitted as standard to prevent accidental disconnection
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Parking Stations are available for the HQ Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F), (With Viton seals): -20°C (-4°F) to 200°C (392°F)
- Couplers have been tested to the ISO 7241-2 Standard

APPLICATIONS

- Hammer circuits
- High pressure pulse applications
- Leak free environments
- Construction plant, mobile equipment, general industrial, nuclear, mining and agricultural industries

H90 SERIES

90 degree flat face couplers made to the ISO 16028 Standard

INTRODUCTION

Holmbury's H90 Series is designed for use in applications that require a 90° elbow in the hydraulic circuit, such as digger booms. The right angle design allows for easy mounting without the need for additional fittings, reducing potential leakage paths and cost.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals

FEATURES

- The H90 Series is designed to connect with the HQ and HCP Series flat face couplers
- 90 degree elbow incorporated into the coupler
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the H90 Series

SPECIFICATIONS

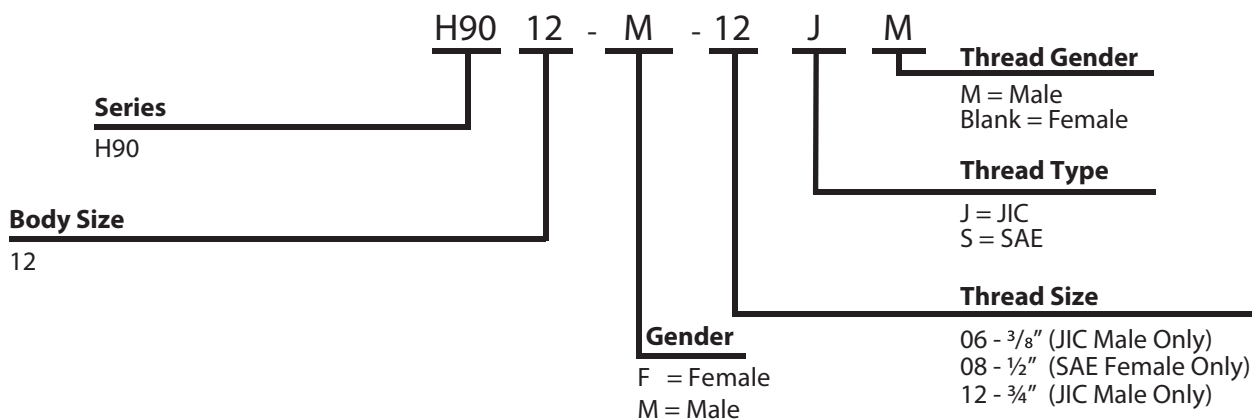

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Hammer circuits
- High pressure pulse applications
- Leak free environments
- Construction plant, mobile equipment, general industrial, nuclear, mining and agricultural industries

HCP SERIES

Connect under pressure flat face male couplers made to the ISO 16028 Standard dimensions

INTRODUCTION

Holmbury's HCP Series male couplers are designed to connect under pressure by hand with up to 350 bar locked in the male half, making it an ideal choice for applications where the ability to connect under pressure is essential. The HCP Series also benefits from all the key features of the HQ Series flat face couplers.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals

FEATURES

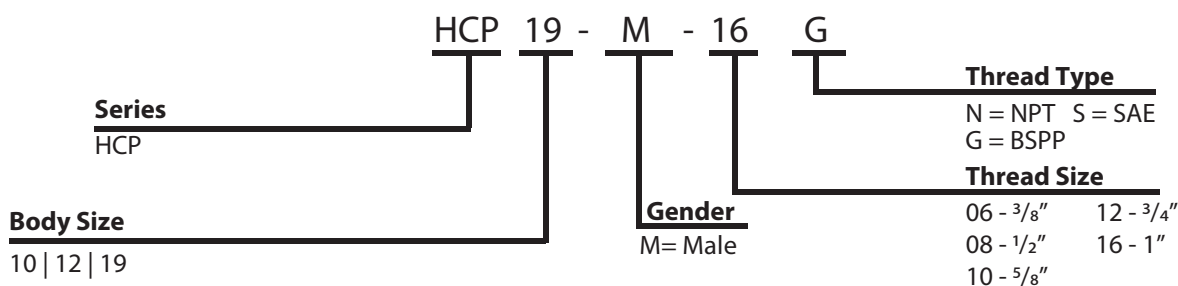

- Designed to connect with the HQ Series female half
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow
- Connect under pressure with up to 350 bar locked in the male half
- Female half must have zero pressure when connecting male half under pressure

ACCESSORIES

- Dust Caps are available for the HCP Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Hot environments where thermal expansion of trapped oil may take place
- Hammer circuits
- High pressure pulse applications
- Leak free environments
- Construction plant, mobile equipment, general industrial, nuclear, mining and agricultural industries

HP SERIES

High pressure flat face couplers fitted with a safety locking sleeve

INTRODUCTION

Holmbury's HP Series flat face couplers provide a leak free solution for high pressure applications up to 720 bar. The safety locking sleeve prevents accidental disconnection and can only be disconnected when the release notch and locking ball align.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals

FEATURES

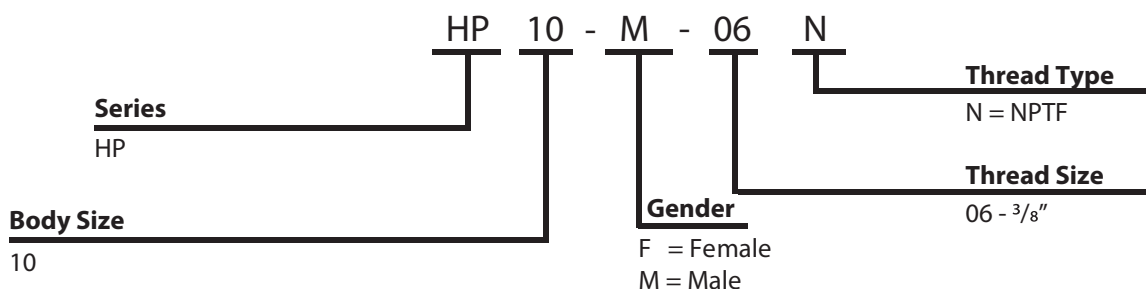

- Spring loaded safety locking sleeve fitted to prevent accidental disconnection, which automatically rotates through 90° when connected
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the HP Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- High pressure plant and equipment
- High pressure pulse applications
- Rail industries; especially on de-stressing kits
- Bolt tensioning
- Cutting tools
- Jacking applications

HFT SERIES

Screw connect flat face couplers

INTRODUCTION

Holmbury's HFT Series screw connect couplers incorporate all of the benefits from the flat face design, while the screw connection strengthens the coupler and eliminates brinelling. Connection and disconnection can be undertaken with high residual pressure in the hydraulic circuit. The HFT Series is an ideal solution for high pressure pulses and many other applications.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals

FEATURES

- Screw connect design eliminates brinelling
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the HFT Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)
- API 16D certified and Lloyds approved for BOP applications (Except size 10)

APPLICATIONS

- Blow out preventors (BOP) on oil & gas applications
- Hydraulic attachments
- Hammer circuits
- High pressure pulse applications
- Leak free environments
- Construction plant, mobile equipment, general industrial, nuclear, mining and agricultural industries

HS SERIES

General purpose screw connect poppet couplers made to the ISO 14541 Standard

INTRODUCTION

Holmbury's Voswinkel HS Series screw connect couplers are designed primarily for high pressure pulse applications. They can be connected under residual system pressures of up to 50 bar. The HS Series is a cost effective, proven solution suited to many industries and applications.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals
- Also available in AISI 316 stainless steel (See SHS Series)

FEATURES

- Screw connect design eliminates brinelling
- Modular construction enables numerous thread and connection options
- Can be connected with up to 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Hammer circuits
- High pressure pulse applications
- Construction plant, mobile equipment, demolition and agricultural industries

ACCESSORIES

- Dust Caps and Plugs are available for the HS Series

5000 SERIES

Heavy duty screw connect couplers

INTRODUCTION

Holmbury's ROFLEX 5000 Series screw connect couplers are designed for heavy-duty, high pressure pulse applications. They are built to withstand the most severe pressure pulses, where other couplers may fail, due to the design preventing the movement of internal components.

CONSTRUCTION

- Carbon steel with trivalent plating
- Available only with BSPP threads
- Fitted with Viton seals

FEATURES

- Screw connect design eliminates brinelling
- Bidirectional flow
- Once connected all internal parts are held rigid which significantly reduces fatigue of the poppet, spring and coupler body
- Can be connected and disconnected under pressure
- All internal components are replaceable
- Supplied with caps and plugs to protect threads and limit inclusion of contaminant

ACCESSORIES

- Dust Caps, Plugs, Seal Kits, Repair Kits, Mounting Brackets and Wrenches are available for the 5000 Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Viton and Nitrile seals): -20°C (-4°F) to 120°C (248°F)

APPLICATIONS

- Hammer circuits
- Shears, rock crushers, test rigs and other intense pressure pulse applications

RH SERIES

Zero leakage screw connect couplers

INTRODUCTION

Holmbury's RH Series screw connect couplers are designed for heavy-duty service conditions in applications including construction plant, high pressure pulse and agricultural machinery.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Nitrile seals

FEATURES

- Screw connect design eliminates brinelling
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow
- Can be connected with up to 50 bar residual pressure in the hydraulic circuit

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the RH Series

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Hammer circuits
- High pressure pulse applications
- Construction plant, mobile equipment, demolition and agricultural industries

PSP | PSB SERIES

High pressure screw connect poppet & ball couplers made to the ISO 14540 Standard

INTRODUCTION

Holmbury's PSP & PSB Series screw connect couplers are designed primarily for high pressure applications. They can be connected under low residual system pressures. The couplers are available with ball or poppet style valves.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Polyurethane & Nitrile seals

FEATURES

- Screw connect design eliminates brinelling
- PSP offers poppet style valve
- PSB offers ball style valve
- Can be connected with low residual pressure in the hydraulic circuit
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the PSP & PSB Series

SPECIFICATIONS

- Operating temperatures (With Nitrile & Polyurethane seals): -30°C (-22°F) to 106°C (223°F)

APPLICATIONS

- High pressure applications (Up to 700 bar for PSB and 1000 bar for PSP)
- General industrial, construction plant, mobile equipment, demolition and agricultural industries
- Hydraulic jacks
- Torque wrenches

TC SERIES

Screw connect tipper couplers

INTRODUCTION

Holmbury's TC Series screw connect tipper couplers are designed for use on tipper trucks. The female coupler has a wing nut sleeve which enables operators to connect the couplers by hand, even when there is low residual pressure in the line.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Screw connect design eliminates brinelling
- Wing nut sleeve design allows connection by hand
- Can be connected with up to 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow
- Male has external thread for bulkhead mounting

ACCESSORIES

- Dust Caps and Plugs are available for the TC Series

SPECIFICATIONS

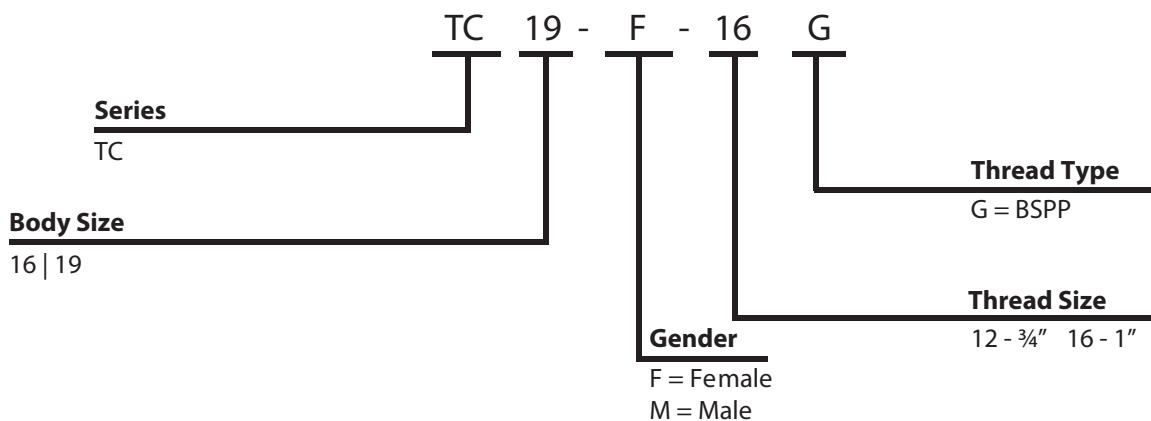

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Tipper trucks
- Commercial vehicle trailers, agricultural equipment and construction plant
- Mobile plant

LC SERIES

Heavy duty screw connect couplers

INTRODUCTION

Holmbury's LC Series heavy duty, screw connect couplers are an ideal solution for hydraulic circuits where high pressure or pressure impulses are present. They are designed primarily for heavy duty applications. An API 16D certified version of LC Series is available in sizes 19 | 25 | 32 which are Lloyds certified in accordance with API 16D and the EUB Directive #36 and suitable for the Oil & Gas industries, for use in blow out preventer (BOP) applications.

CONSTRUCTION

- Carbon steel with trivalent plating
- Cast steel heavy duty sleeve
- Fitted with Nitrile seals

FEATURES

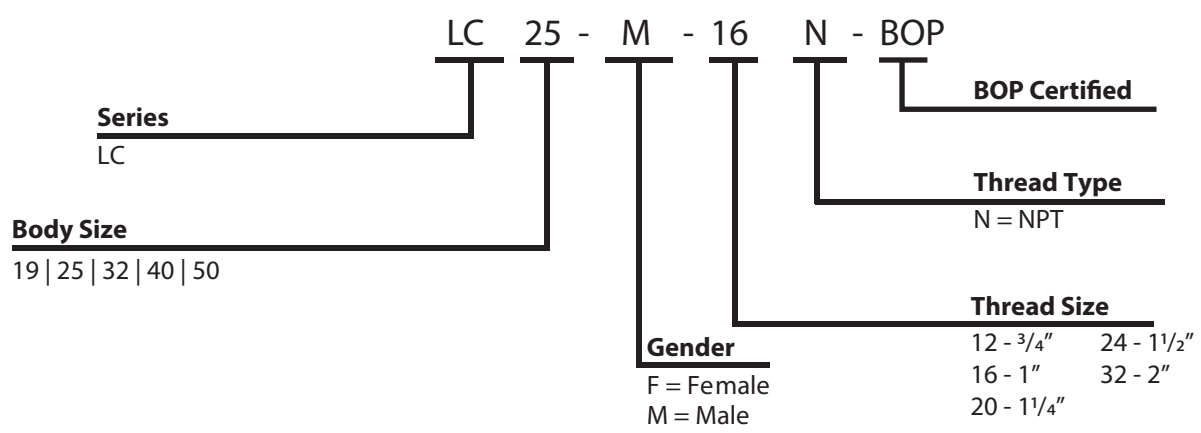

- Inspection hole enables check of complete connection between both halves
- Screw connect design eliminates brinelling
- Hard wearing heavy duty sleeve
- Bidirectional flow

ACCESSORIES

- Dust caps and Plugs are available for the LC Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)
- API 16D certified and Lloyds approved for BOP applications in sizes 19 to 32

APPLICATIONS

- Heavy duty applications
- High pressure pulse applications

PS SERIES

Extra heavy duty high flow couplers

INTRODUCTION

Holmbury's PS Series extra heavy duty screw couplers have been developed to withstand high flows, intense pressure pulses and vibration. At an independent test laboratory they have exceeded 3,000,000 impulse cycles while being subjected to heavy vibration in the horizontal and vertical planes.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Fitted with Viton seals

FEATURES

- Screw connect design eliminates brinelling
- Once fully connected all internal components are held rigid, significantly reducing the risk of material fatigue
- Can accommodate flow rates up to 1000 L/Min with minimal pressure drop
- Attachment changeover time significantly quicker than with fixed pipes or valves
- Can be connected with up to 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the PS Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- High reach demolition machines
- Large excavators over 20 tons

PLC SERIES

Screw connect and pull break couplers

INTRODUCTION

Holmbury's PLC Series screw connect couplers allow for connection under pressure and are ideal choice for snow removal applications with high pressure pulses.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Screw connection only possible with both halves of PLC Series
- Screw connect design eliminates brinelling
- Can be connected with residual pressure in the system
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the PLC Series

SPECIFICATIONS

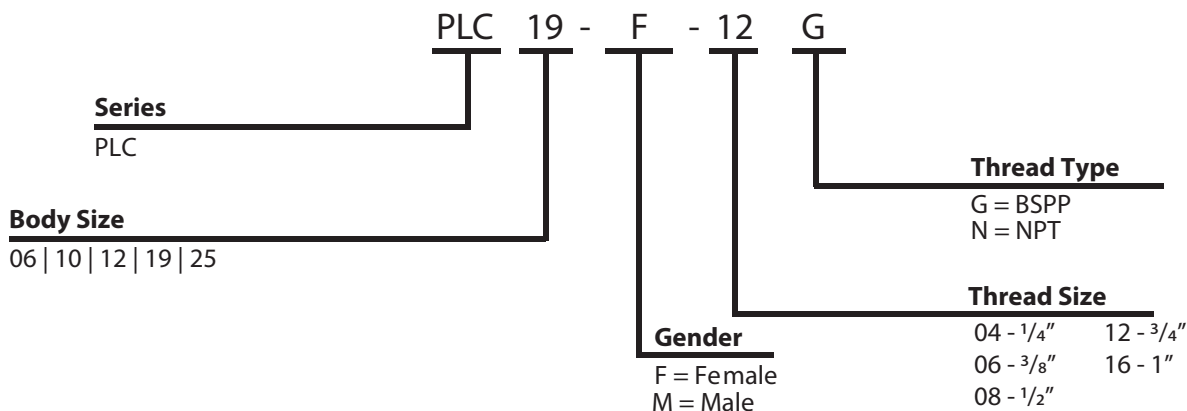

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Snow removal
- Agricultural
- General industrial
- Mobile equipment

IA / IAZ SERIES

ISO A couplers made to the ISO 7241:2014 Series A Standard

INTRODUCTION

Holmbury's IA / IAZ Series ISO A couplers are the ideal choice where a tough, durable product of superior quality is required. They are perfectly suited to agricultural and industrial applications.

CONSTRUCTION

- Carbon steel with trivalent plating (Zinc nickel plating available with IAZ Series)
- Fitted with Nitrile seals (Viton seals available)
- Also available in AISI 316 stainless steel (See IAS Series)

FEATURES

- Optional zinc nickel plating provides corrosion resistance (1200 hours with no red rust in salt spray tests)
- Poppet valves have balanced springs
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs, Parking Stations and Seal Kits are available for the IA / IAZ Series

SPECIFICATIONS

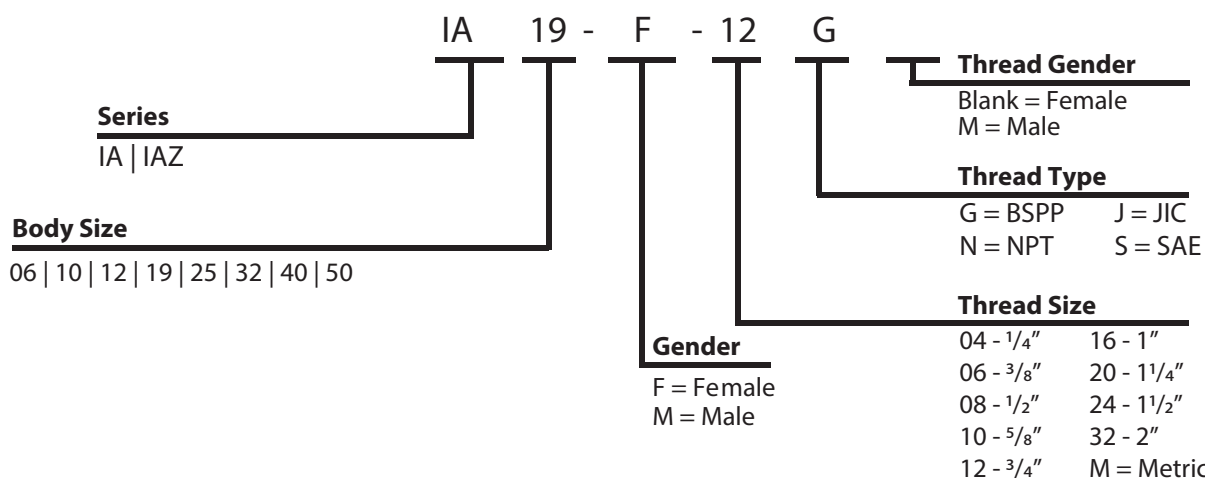

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F), (with Viton seals): -20°C (-4°F) to 200°C (392°F)

IB / IBZ SERIES

ISO B couplers made to the ISO 7241:2014 Series B Standard

INTRODUCTION

Holmbury's IB / IBZ Series ISO B couplers are the ideal choice where a tough, durable product of superior quality is required. They are perfectly suited to agricultural and industrial applications

CONSTRUCTION

- Carbon steel with trivalent plating (Zinc nickel plating available with IBZ Series)
- Fitted with Nitrile seals (Viton seals available)
- Also available in AISI 316 stainless steel (See IBS Series)
- Also available in brass (See IBB Series)

FEATURES

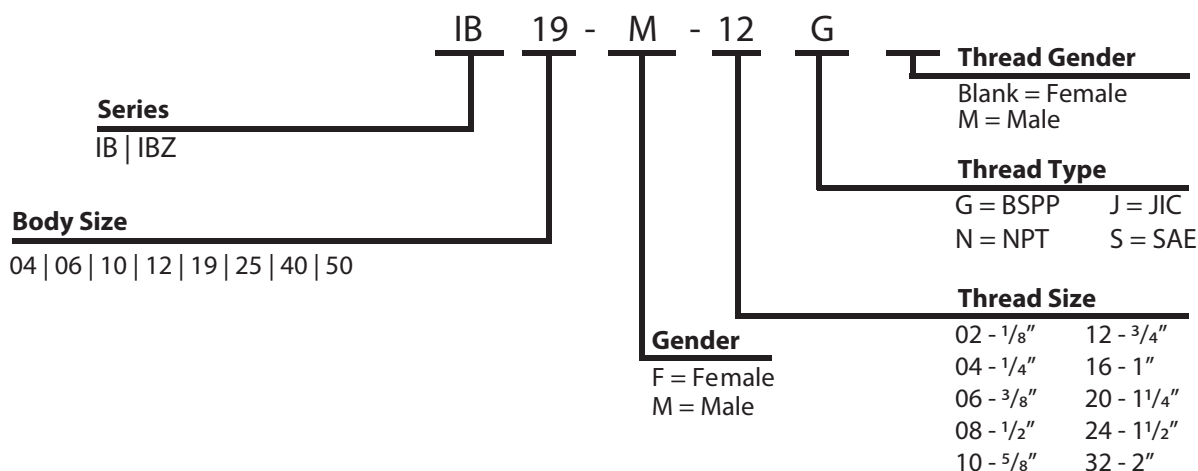

- Optional zinc nickel plating provides corrosion resistance (1200 hours with no red rust in salt spray tests)
- Poppet valves have balanced springs
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the IB / IBZ Series

IAP SERIES

Connect under pressure female couplers (Connects to 1/2" ISO A male probes)

INTRODUCTION

Holmbury's IAP Series ISO A female couplers are designed primarily for the agricultural industries and incorporate a push-pull design. The coupler can be either panel mounted using circlip grooves or manifold mounted.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals
- Available with either a short or long body

FEATURES

- Can be connected with residual pressure in the line
- Can be connected with standard ISO A or DIN V 1/2" male couplers
- Release mechanism protects coupler and hose from damage in event of accidental separating force
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the IAP Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Agricultural
- Mobile
- Construction

ORDER CODES

*Please specify whether you require short or long body when ordering

IAPC SERIES

Connect under pressure ISO A couplers made to the ISO 7241:2014 Series A Standard

INTRODUCTION

Holmbury's IAPC Series ISO A couplers incorporate a pressure relief mechanism that enable them to be connected under pressure by hand.

CONSTRUCTION

- Carbon steel with trivalent plating
- Female half available in either a 'Pull Break' or 'Push Pull' design (See drawing for differentiation)
- Fitted with Nitrile seals

FEATURES

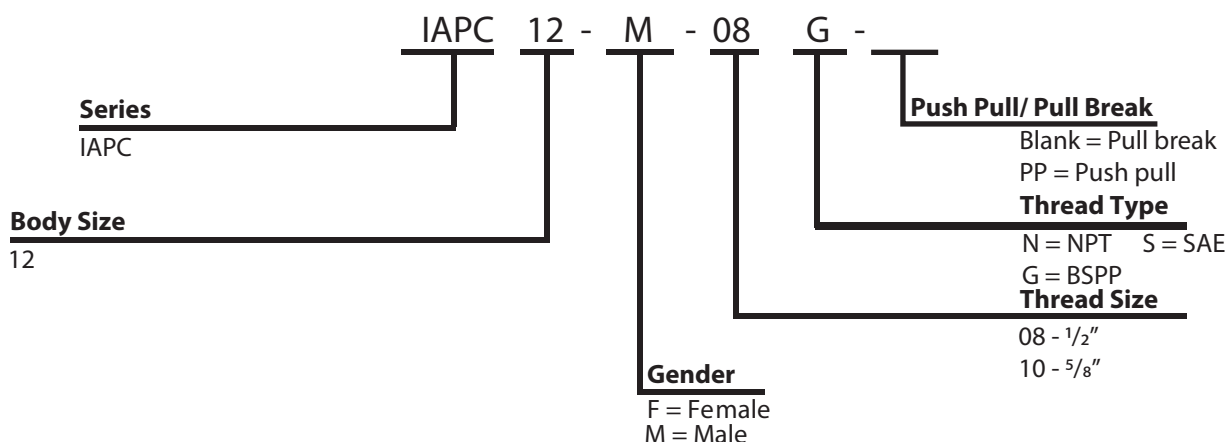

- Connects with up to 250 bar residual pressure (If both male and female are IAPC couplers)
- Poppet valves have balanced springs
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the IAPC Series

P SERIES

ISO A push / pull female couplers (Connects with 1/2" ISO A male probes)

INTRODUCTION

Holmbury's P Series ISO A female couplers are designed primarily for the agricultural industries and incorporate a push-pull design. The coupler is panel mounted using circlip grooves in the locking sleeve.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals
- Also available in connect under pressure variant (See IAPC Series)

FEATURES

- Can be connected with standard ISO A 1/2" male couplers
- Available with ball seal mechanism in body size 12 only
- Release mechanism protects coupler and hose from damage in event of accidental separating force
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the P Series

SPECIFICATIONS

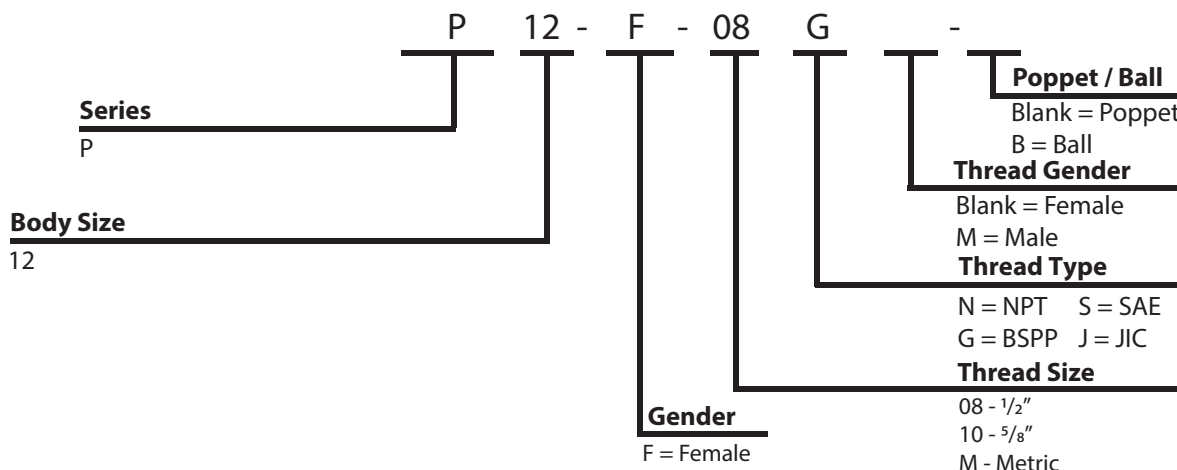

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Agricultural
- Mobile

DIN V / DNVZ SERIES

Poppet seal couplers made to the ISO 5675 Standard

INTRODUCTION

Holmbury's DIN V / DNVZ Series couplers are designed with a poppet valve for quick and connection and disconnection. They are interchangeable with the ISO A couplers in 1/2" size only.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals
- Also available in ball valve design (See DIN B / DNBZ Series)

FEATURES

- Made to ISO 5675 Standard in 1/2" size only
- 1/2" male has internal diverter to prevent reverse flow checking
- Optional zinc nickel plating provides corrosion resistance (1200 hours with no red rust in salt spray tests)
- Poppet valves have balanced springs
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the DIN V / DNVZ Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Agricultural
- Mobile
- Construction

DIN B / DNBZ SERIES

Ball seal couplers made to the ISO 5675 Standard

INTRODUCTION

Holmbury's DIN B / DNBZ Series ball valve couplers are intended for applications where compatibility with existing equipment is essential. For new applications Holmbury recommends poppet valve couplers as a more durable option.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals
- Also available in poppet valve design (See DIN V / DNVZ Series)

FEATURES

- Made to ISO 5675 Standard in 1/2" size only
- 1/2" male has internal diverter to prevent reverse flow checking
- Optional zinc nickel plating provides corrosion resistance (1200 hours with no red rust in salt spray tests)
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the DIN B / DNBZ Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Existing DIN B applications
- Agricultural
- Mobile
- Construction

HTN SERIES

Poppet style couplers with a guided poppet

INTRODUCTION

Holmbury's HTN Series poppet style couplers are a reliable and efficient option for use across a wide range of hydraulic applications.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Poppet style minimizes pressure drop and creates an effective seal while allowing high flow rates
- Elongated nose and poppet design allows for simple connection and disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the HTN Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Designed for usage in general hydraulic systems, machine tool, test equipment, agricultural, and other mobile hydraulics

F SERIES

Connect under pressure high flow couplers with a safety locking sleeve

INTRODUCTION

Holmbury's F Series high flow safety couplers offer three important benefits; high flow, connection under pressure and a safety locking mechanism to prevent accidental disconnection.

CONSTRUCTION

- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- QPQ finished locking ring
- Fitted with Nitrile seals

FEATURES

- High flow rates
- Pressure eliminator allows connection with residual pressure in the hydraulic circuit
- Low pressure drop characteristics
- Safety locking ring to avoid accidental disconnection
- Female half has double 'O' ring sealing arrangement
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the F Series

ORDER CODES

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Mobile plant
- General industrial

PWC SERIES

Free flow, valveless pressure washer couplers

INTRODUCTION

Holmbury's PWC Series couplers are able to accommodate high flow rates and minimal pressure drops. The couplers are valveless, hence when disconnected any fluid in the system can escape. This makes these couplers suitable for the transmission of non-hazardous fluids only.

CONSTRUCTION

- Carbon steel with trivalent plating and QPQ finished female sleeve
- Fitted with Viton seals
- Available in AISI 316 stainless steel (See PWS Series)

FEATURES

- Valveless design allows for high flow rates and minimal pressure drop characteristics
- Female half has double 'O' ring sealing arrangement
- Bidirectional flow

ACCESSORIES

- Seal Kits are available for the PWC Series

SPECIFICATIONS

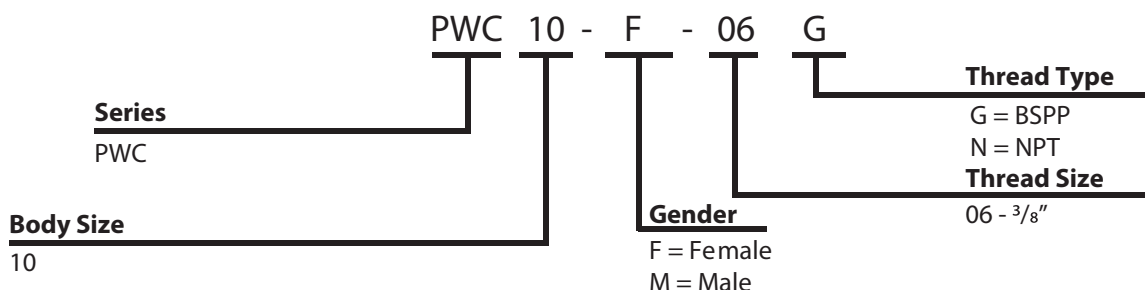

- Operating temperatures (with Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Designed for use in pressure washer systems and systems containing non-hazardous fluids

TB SERIES

Trailer brake couplers made to the ISO 5676 Standard

INTRODUCTION

Holmbury's TB Series trailer brake couplers are used to connect the hydraulic braking system of tractors to trailers. The male coupler is normally panel mounted on the tractor.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Male couplers can be panel mounted
- Female couplers are supplied with Parking Station
- Bidirectional flow

ACCESSORIES

- Parking Stations are available for the TB Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Trailer connections

KM 115/116 SERIES

High pressure poppet valve couplers

INTRODUCTION

Holmbury's KM 115/116 Series high pressure poppet valve couplers are primarily used in bolt tensioners and other high pressure applications. The KM 116 can withstand a higher maximum working pressure than the KM 115.

CONSTRUCTION

- KM 115- Carbon steel with grey zinc nickel plating (1200 hours with no red rust in salt spray tests)
- KM 116- Carbon steel with black zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Available in size 02 body with 1/4" NPT or BSP threads
- Fitted with Nitrile seals

FEATURES

- 1000 bar maximum working pressure (KM 115), 1500 bar maximum working pressure (KM 116)
- Poppet valve design
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the KM Series

KM 115

KM 116

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Bolt tensioners
- Hydraulic jacks
- Hydraulic hammers
- Other high pressure applications

WARNING

Hydraulic couplers operating at high pressures pose a significant risk to personal safety. Please refer to our Safety Guidelines for more information.

DTP SERIES

Diagnostic test point couplers made to the ISO 15171-1 Standard

INTRODUCTION

Holmbury's DTP Series diagnostic test point couplers are designed to connect & disconnect pressure gauges to hydraulic systems for diagnostic purposes.

CONSTRUCTION

- Carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Pull sleeve allows push to connect operation
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps are available for the DTP Series

SPECIFICATIONS

- Operating temperatures (with Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Pressure testing on hydraulic systems

MP SERIES

Multiplate couplers

INTRODUCTION

Holmbury's MP Series multiplate couplers allow the simultaneous connection of multiple hydraulic lines. The MP Series inherits the benefits of Holmbury's flat face coupler design. Currently available with 2, 4 or 6 port design.

CONSTRUCTION

- Couplers and handle- Carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Body- Aluminium black anodized
- Button - Aluminium red anodized
- Fitted with Nitrile and polyurethane seals

FEATURES

- Connect under pressure male couplers
- Couplers are circlip mounted and can be replaced or removed easily
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Electrical connections may be added upon request
- Various configurations for handle and button arrangement available upon request
- Bidirectional flow

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

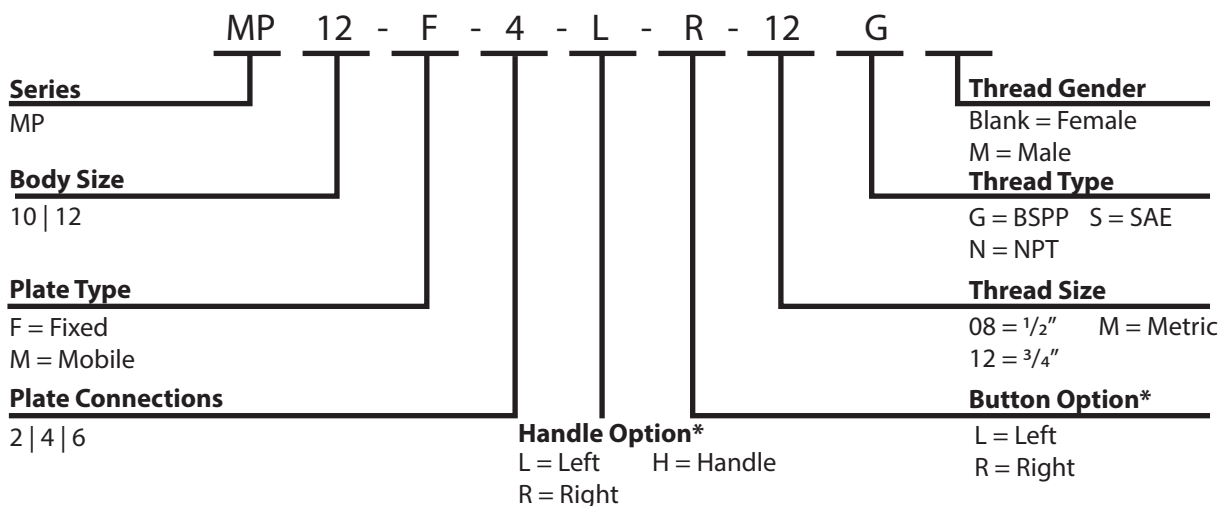

APPLICATIONS

- Leak free environments
- Mobile construction equipment
- Tractors and other agricultural machinery
- General industrial

* Handle Option and Button Option only applicable to fixed plate order codes

HDB SERIES

Decompression block couplers

INTRODUCTION

Holmbury's HDB Series is a block coupler designed for the quick changeover of hydraulic attachments for skid steer loaders, compact loaders, backhoe loaders and compact utility vehicles. The decompression feature enables the operator to alleviate trapped pressure, allowing the quick and easy connection of various attachments.

CONSTRUCTION

- HQ Series couplers are carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Block body is ductile cast iron
- Fitted with Nitrile and PTFE seals

FEATURES

- Operator friendly decompression system allows for easy connection and disconnection with trapped residual pressure
- Pull activation feature prevents accidental system decompression
- All couplers are flat face and are designed to the ISO 16028 Standard
- Low profile coupler design minimizes side loading
- Coupler arrangement can be ordered in 1/2" (Size 12) for standard flow or 3/4" (Size 19) for high flow applications
- Case drain coupler is standard 3/8" (Size 10)
- Low cost replacement couplers
- Accessible design allows for servicing of internal components

ORDER CODES

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F).
- Maximum working pressure 350 bar
- Flow rate at 2 bar delta P 1/2" (size 12) 76.4 L/Min & 3/4" (size 19) 136 L/Min
- Decompression force 130 Nm at 275 bar trapped pressure

APPLICATIONS

- Quick changeover of construction equipment attachments
- Skid steer loaders
- Track loaders
- Excavators
- Compact loaders
- Utility vehicles

PRESSURE DROP CHARACTERISTICS

FFC SERIES

Replacement cartridge couplers for the Faster 4BD4FH/4BD4FI

INTRODUCTION

Holmbury's FFC Series is a replacement flat face cartridge coupler for the Faster 4BD4FH and 4BD4FI blocks. The FFC Series is designed for the quick changeover of hydraulic attachments for skid steer loaders, compact loaders, backhoe loaders and compact utility vehicles. The female coupler features an internal decompression solution (*Patent pending*) that enables the coupler to always be depressurized when disconnected, whilst the male coupler has built-in connect under pressure functionality.

CONSTRUCTION

- Couplers are carbon steel with zinc nickel plating (1200 hours with no red rust in salt spray tests)
- Currently available in size 12 body
- Fitted with Nitrile seals

FEATURES

- Internal design allows the female half to always be depressurized when disconnected
- Male has built-in connect under pressure functionality
- Couplers are flat face and are designed to the ISO 16028 Standard
- Low profile coupler design minimizes side loading
- Low cost replacement couplers

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)
- Maximum working pressure 350 bar

APPLICATIONS

- Quick changeover of construction equipment attachments
- Skid steer loaders
- Track loaders
- Excavators
- Compact loaders
- Utility vehicles

PRESSURE DROP CHARACTERISTICS

HSS SERIES

Stainless steel flat face couplers made to the ISO 16028
Standard dimensions

INTRODUCTION

Holmbury's HSS Series stainless steel flat face couplers incorporate all the benefits of the carbon steel HQ Series couplers, while being perfectly suited for corrosive fluids and environments.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals (Other seals available on request)
- Also available in carbon steel (See HQ Series)

FEATURES

- Safety locking sleeve fitted as standard to prevent accidental disconnection
- Flat faces are easily wiped clean
- Allows for minimal inclusion of air and contaminants during connection
- Flat face design prevents fluid loss during disconnection
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the HSS Series

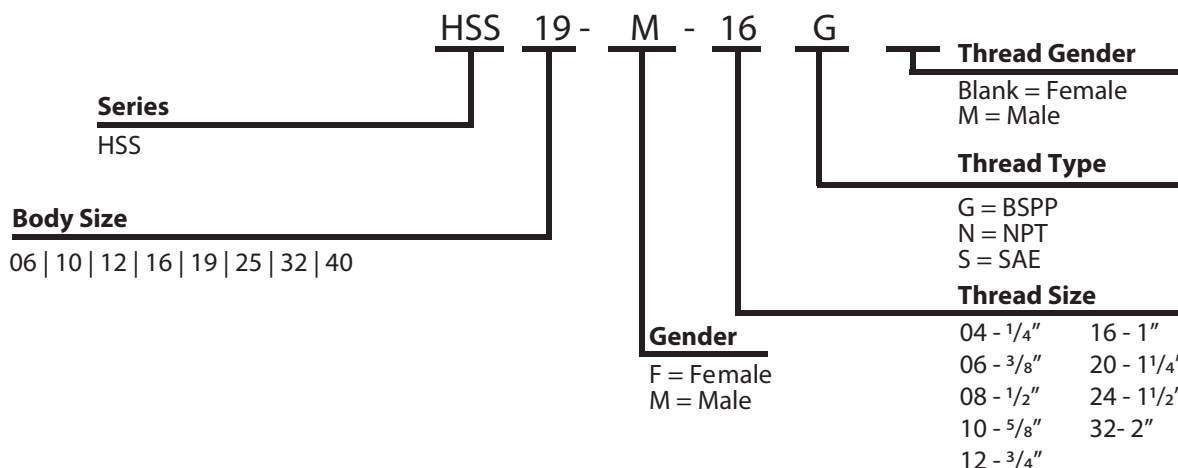

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Corrosive fluids and environments
- Marine
- Oil and gas
- Chemical
- Pharmaceutical
- Nuclear

IAS SERIES

Stainless steel ISO A couplers made to the ISO 7241:2014 Series A Standard dimensions

INTRODUCTION

Holmbury's IAS Series stainless steel ISO A couplers incorporate all the benefits of the carbon steel IA Series couplers, while being perfectly suited for corrosive fluids and environments.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals (Other seals available on request)
- Also available in carbon steel (See IA Series)

FEATURES

- Poppet valves have balanced springs
- Locking ball system allows for quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the IAS Series

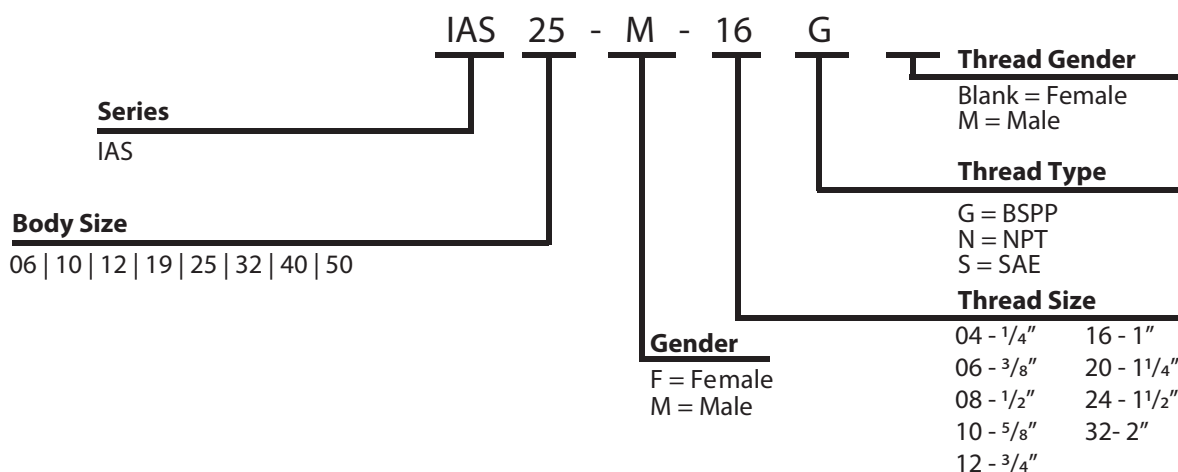

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

IBS SERIES

Stainless steel ISO B couplers made to the ISO 7241:2014 Series B Standard dimensions

INTRODUCTION

Holmbury's IBS Series stainless steel ISO B couplers incorporate all the benefits of the carbon steel IB Series couplers, while being perfectly suited for corrosive fluids and environments.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals (Other seals available on request)
- Also available in brass (See IBB Series)
- Also available in carbon steel (See IB Series)

FEATURES

- Poppet valves have balanced springs
- Locking ball system allows for quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the IBS Series

SHS SERIES

Stainless steel general purpose screw connect couplers made to the ISO 14541 Standard dimensions

INTRODUCTION

Holmbury's SHS Series stainless steel screw connect couplers are designed primarily for high pressure pulse applications. They incorporate all the benefits of the carbon steel HS Series, while being perfectly suited for corrosive fluids and environments.

CONSTRUCTION

- AISI 316 stainless steel (All components)
- Fitted with Viton seals (Other seals available on request)
- Also available in carbon steel (See HS Series)

FEATURES

- Can be connected with 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the SHS Series

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Hydraulic jacks
- Marine
- Oil and gas

Stainless steel high pressure heavy duty screw connect couplers

INTRODUCTION

Holmbury's PTS Series stainless steel screw connect couplers are designed for heavy duty applications involving very high pressures and severe pressure pulses. They incorporate all the benefits of the carbon steel PTC Series, while being perfectly suited for corrosive fluids and environments.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals (Other seals available on request)
- Also available in carbon steel (See PTC Series)

FEATURES

- Can be connected with 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow

ACCESSORIES

- Dust Caps and Plugs are available for the PTS Series

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Hydraulic jacks
- Marine
- Oil and gas

PWS SERIES

Stainless steel pressure washer couplers

INTRODUCTION

Holmbury's PWS Series stainless steel, pressure washer couplers are able to accommodate high flow rates and minimal pressure drops. The couplers are valveless, hence when disconnected any fluid in the system can escape. This makes these couplers suitable for the transmission of non-hazardous fluids only.

CONSTRUCTION

- AISI 316 stainless steel
- Fitted with Viton seals
- Also available in carbon steel (See PWC Series)

FEATURES

- Valveless design allows for high flow rates and minimal pressure drop characteristics
- Female half has double 'O' ring sealing arrangement
- Bidirectional flow

ACCESSORIES

- Seal Kits are available for the PWS Series

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Designed for use in pressure washer systems and systems containing non-hazardous fluids

WSC SERIES

Brass wing style screw connect couplers with steel nut

INTRODUCTION

Holmbury's WSC Series brass screw connect couplers are designed to allow connection and disconnection by hand. The brass construction makes them the idea choice for water based applications.

CONSTRUCTION

- Brass body
- Wing nut carbon steel with trivalent plating
- Fitted with Nitrile seals

FEATURES

- Can be connected with 50 bar residual pressure in the hydraulic circuit
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Mounting Flanges are available for the WSC Series

SPECIFICATIONS

- Operating temperatures (With Nitrile seals): -40°C (-40°F) to 106°C (223°F)

APPLICATIONS

- Trailers
- Wet line kits
- Oil and gas

IBB SERIES

Brass ISO B couplers made to the ISO 7241:2014 Series B
Standard dimensions

INTRODUCTION

Holmbury's IBB Series brass ISO B couplers incorporate all the benefits of the carbon steel IB Series couplers while providing good corrosion resistance for specific applications.

CONSTRUCTION

- Brass body
- AISI 316 spring and AISI 302 locking ball
- Fitted with Viton seals
- Also available in carbon steel (See IB Series)
- Also available in AISI 316 stainless steel (See IBS Series)

FEATURES

- Poppet valves have balanced springs
- Locking ball system allows quick connection
- Bidirectional flow

ACCESSORIES

- Dust Caps, Plugs and Seal Kits are available for the IBB Series

SPECIFICATIONS

- Operating temperatures (With Viton seals): -20°C (-4°F) to 200°C (392°F)

APPLICATIONS

- Cooling systems
- Marine
- Oil and gas
- Chemical
- Pharmaceutical

ACCESSORIES

DUST CAPS & PLUGS

Dust Caps and Plugs for most Series in either PVC, flip-top, steel, aluminium or stainless steel. Dust Caps and Plugs protect the couplers and valves from ingress of dirt and contaminants.

PARKING STATIONS

Parking Stations for a range of Series including screw and push connect types, constructed from trivalent plated carbon steel. Parking Stations are used to safely secure one half of the coupler when not connected.

SEAL KITS

Seal Kits in a range of materials including Viton, Nitrile and Kalrez, dependant on Series. The Seal Kits enable the user to replace existing seals, increasing the lifespan of the coupler.

REPAIR KITS

Repair Kits for the 5000 Series. These kits enable all components within the 5000 Series to be replaced, increasing the coupler lifespan. The Repair Kits include replacement poppets, springs, seals and collets. Appropriate tools are also provided to fit the replacement parts. See the Holmbury website for instructional videos on replacing parts.

MOUNTING FLANGES

Mounting Flanges for the WSC Series in carbon steel. The flanges are either made from machined or pressed steel, dependant on body size. Designed for mounting the male half onto bulkheads.

SAFETY GUIDELINES

For the care and operation of Holmbury couplers

CAUTION: It is important that users of the Quick Release Couplers read the following Safety Guidelines. Improper use of the Holmbury products can lead to severe injury and damage to equipment.

Holmbury couplers have established an excellent track record since their introduction in 1982. If used correctly they will give lengthy, trouble-free service. Where problems have been experienced with Holmbury couplers and returned for examination, the most common causes were found to be dirt, neglect and abuse. These guidelines are intended to help maximize the operating life of Holmbury couplers.

The Essential Do's

1. Always wipe the two mating faces clean before connecting
2. It is recommended that Dust Caps and Plugs be used when the couplers are disconnected
3. Always align the external locking ball (if used) with the notch in the locking sleeve and then pull the locking sleeve back fully to disconnect
4. If a coupler sticks, first check that pressure has been released. Ensure the locking ball and notch in the locking sleeve are aligned, pull back the sleeve and twist the couplers apart. Sticking is normally caused by dirt in the coupler or physical damage due to abuse
5. Connect and disconnect new couplers two or three times to work the PTFE seals. Sometimes a new coupler will stick if the seal has not been worked
6. When fitting couplers, only apply the spanner or grips to the hexagon and nowhere else
7. Avoid damage to the coupler faces. Burrs and scratches cause damage to the seals and cause leaks. They can also impede connection and disconnection of the couplers
8. Periodically lubricate the internal locking balls on the female half of the coupler with silicone grease
9. All hydraulic systems should be protected with a good quality filter, minimum 25µ filtration is recommended. The filter should be changed at regular intervals, in accordance with the manufacturer's instructions. Adequate filtration ensures the oil remains free of contaminants that can damage the internal seals of the coupler

The Essential Don't's

1. Never attempt to reconnect using a damaged half coupler, as this will destroy the seals in the mating half and necessitate replacement of both halves
2. Do not leave the coupler where it may be run over by a vehicle or otherwise crushed. This will distort the sleeve and prevent connection and disconnection
3. Never try to turn the sleeve when the coupler is disconnected since this will cause the locking ball to jam under the locking sleeve and damage the coupler
4. Never try to strip the coupler down. There are no user serviceable parts. If the coupler is damaged it should be replaced with a new coupler
5. Never hit the centre poppet of the coupler to try and release locked in pressure. This can cause irreparable damage to the coupler and serious injury
6. When fitting couplers, never clamp on the sleeve of the female or nose of the male - this will cause distortion and damage
7. Never subject the couplers to external forces, especially side load. This can reduce the life of the coupler or cause failure
8. Never allow the torsional forces transmitted from hoses to unscrew/screw together couplers. Utilise rotary couplers (See Holmbury Rotary Couplers)
9. Never use a coupler as a plug
10. Do not connect and disconnect with pressure in the line, unless the coupler type is specifically designed to do so
11. Connecting a Holmbury coupler half with another manufacturer's coupler half could damage internal seals and invalidate warranty. Check with Holmbury before mismatching couplers

Since Holmbury has no control over the use and application of its products it cannot accept liability for any injury, loss or damage arising directly or indirectly from the use of its products. Information taken from this brochure is intended to serve as a guide only. Customers should, through appropriate tests, satisfy themselves that the products are suitable for their intended use.

TECHNICAL INFORMATION

Zinc nickel plating

INTRODUCTION

Holmbury recently submitted a selection of their zinc nickel plated couplers for testing alongside several competitor solutions. The results were quite remarkable and proved beyond doubt that Holmbury offers the most effective corrosion protection currently on the market. Zinc nickel plating is available as standard on several of our product series and available as an option on many others. Please enquire for more details.

SALT SPRAY TESTING

A total of eight couplers, which included Holmbury zinc nickel and trivalent plated couplers, were submitted initially for 480 hours of salt spray exposure according to ASTM B117. All samples were salt spray test in accordance with the instructions provided in ASTM B117, "Standard Procedure for Operating Salt Spray (Fog) Apparatus". As the test reached its conclusion it became clear that the Holmbury zinc nickel plating would far exceed the 480 hour mark. The test was continued in order to ascertain the failure point for the Holmbury zinc nickel plated couplers.

RESULTS

At 1200 hours the decision was made to terminate the test, as it could not be run indefinitely. At this point the Holmbury zinc nickel plated samples still showed no signs of red rust. The below pictures show one of the Holmbury zinc nickel plated couplers at various stages of testing:

TERMS & CONDITIONS

Holmbury Terms & Condition of Sales

1. DEFINITIONS: In these Conditions "Holmbury" shall mean Holmbury Limited, "The Customer" shall mean the person or persons or firm or company to whom any quotation is addressed or with whom any contract is made and "the Goods" shall mean the goods or any part thereof, agreed to be sold as described on the face hereof, and any repaired, replaced or spare part. "The Delivery Date" shall mean the date notified to the Customer by Holmbury under Clause 4 (c) hereof. **2. CONTRACT:** (a) All quotations given and all contracts made by Holmbury are subject to these terms, conditions and exceptions contained herein, and all conditions and exceptions referred to by the Customer or contained in any order, acceptance of estimate or quotation, or otherwise brought to Holmbury's notice are hereby excluded. (B) Quotations issued by Holmbury are not offers capable of acceptance so as to make a binding contract. All orders placed with Holmbury require its acceptance before any contract arises. Any delivery period shall run from the date of such acceptance. (C) No servant or agent of Holmbury has any authority to make any representation, or to give any warranty relating to the Goods or to agree to any variation of, or addition to these conditions, unless such representation, warranty, variation or addition is expressed in writing and signed on behalf of Holmbury by a Director and is incorporated or referred to in Holmbury's quotation or acceptance of order. (D) These conditions, together with any special terms and conditions specified on the quotation or acceptance of order issued by Holmbury and any drawings plans or other documents referred to therein, shall on acceptance by Holmbury of the Customer's order constitute the entire agreement between Holmbury and the Customer to the exclusion of any antecedent or contemporaneous written or oral understandings, agreements or representations in respect of the supply of the Goods. **3. PRICES AND PAYMENT:** (a) All prices quoted in the contract are F.O.B the port of shipment selected by Holmbury or ex Holmbury's warehouse or otherwise as may be specified in Holmbury's quotation or acceptance of order and are those prevailing at the time of the contract, but the prices ruling at the date of delivery shall apply and shall be paid by the Customer. (B) Holmbury may add to the prices quoted in the contract a sum sufficient to compensate Holmbury for any increase in the cost to Holmbury of producing the Goods occurring after the date of the quotation (including, but not limited to increases in the costs of labour, raw materials, bought in parts, transport and overheads) and to preserve Holmbury's profit margin. (C) If work is suspended or slowed down because of the Customer's instructions, lack of instructions or failure to supply specifications or parts, additional charges may be made. (D) Unless the prices quoted in the contract are expressly shown to include Value Added Tax, all prices are subject to the addition of such Tax, where applicable. (E) Unless otherwise agreed in writing with the Customer or stated on the face hereof the price of the Goods shall be paid to Holmbury in full in cash not later than the tenth day of the month following the date of Holmbury's invoice in respect of the Goods. Interest shall be due and payable to Holmbury for late payment at the rate of 6% per annum from the due date of payment of Holmbury's invoice (As well as before any judgement) until payment is actually received by Holmbury. (F) All amounts due to Holmbury in respect of the supply of the Goods shall be paid at the offices of Holmbury Ltd at Premier House, 1 Vale Rise, Tonbridge, Kent TN9 1TB. (G) If where the price payable in respect of the Goods is due otherwise than in advance of or on delivery of the Goods, in the reasonable opinion of Holmbury the credit rating of the Customer becomes unsatisfactory prior to delivery, or if the Customer fails to perform or observe any obligations on his part to be performed or observed under this or any other contract made with Holmbury, Holmbury shall be entitled at its discretion to delay delivery of the Goods until payment therefore is rendered by the Customer or until such obligations are duly performed or observed by notice in writing to the Customer unilaterally to cancel the contract for the supply of Goods. **4. DELIVERY AND RISKS:** (a) Delivery is to take place F.O.B the port of shipment selected by Holmbury or ex Holmbury's warehouse as may be specified in Holmbury's quotation or acceptance of order, unless otherwise specified by Holmbury and the risks of damage to or destruction of the Goods shall thereupon pass to the Customer. Where delivery is delayed due to any act of the Customer for whatever reason, such risk shall pass on the date on which delivery would have taken place for such act. (B) Any delivery date or delivery period, whether stated in the contract or otherwise notified to the Customer is an estimate only and Holmbury shall not be liable for any loss or damage whatsoever caused by the failure to make delivery on such date or within such period. **5. PROPERTY:** (a) Although risk in Goods shall pass to the Customer, as provided in Clause 4 above, property in the Goods shall not then pass to the Customer but shall remain in Holmbury until the Customer has paid to Holmbury all sums owing or due to Holmbury on any account whatsoever and has duly performed or observed all obligations of whatsoever kind on his part to be performed or observed under this or any other contract made with Holmbury provided that always that the Customer shall indemnify Holmbury against all claims, demands, damages, penalties, costs, expenses or liabilities arising out of or in connection with Holmbury's continued ownership of the Goods. (B) While the Goods remain the property of Holmbury, Holmbury may retake possession of them at any time without notice to the Customer and for this purpose Holmbury may be its servants or agents enter upon any land or premises where it believes the Goods may be. (C) The Customer may sell the Goods and deliver them to the purchaser thereof provide that the Customer does so in the ordinary course of its business. Notwithstanding any agreement or provision for the granting of credit by Holmbury to the Customer, the Customer shall account to Holmbury for the proceeds of such sale, and pending such accounting shall hold such proceeds of sale as fiduciary for Holmbury. If Holmbury so requires, the Customer will assign any debt due from such purchaser to Holmbury. (D) The provision of Clause 5(A), (B) and (C) above shall continue to apply to the Goods notwithstanding any admixture with other Goods or other use or transformation of the Goods by any process of manufacture. **6. STORAGE:** Holmbury shall be entitled to store the Goods, either at their own premises or elsewhere at the Customer's expense in the following circumstances: (A) If the Goods are delivered F.O.B or ex Holmbury's warehouse, where the Customer fails to take delivery on the due date; or (B) If the Goods are delivered by the Customer to a specified place; (ii) Where Holmbury is ready to despatch the Goods, but needs delivery instructions and such instructions have not been provided by the Customer; or (iii) Where Holmbury is ready to despatch the Goods and the Customer is or will be unable to accept delivery when tendered. **7. ALTERATIONS AND IMPROVEMENTS:** (a) Holmbury or its sub-contractors may carry out without notice to the Customer alterations or improvements in design, materials, or methods of manufacture from time to time, and may substitute other reasonably similar parts for any proprietary or special part ordered by the Customer, which Holmbury or its sub-contractors considers to be unobtainable, or unobtainable in sufficient quantities or unobtainable in sufficient time or procurable with difficulty or at an excessive cost. (B) Further Holmbury may supersede, materially alter or abandon the design or type of the Goods contracted for, and may substitute another design or type. In exercising this right, Holmbury shall give written notice to the Customer and the Customer may within 14 days after such notice is given, terminate the contract by giving notice to Holmbury. If the contract is so terminated, the deposit, if any, shall be returned to the Customer, but no other claim for loss or damage may be made. (C) If, in the opinion of Holmbury, there is no design or type which could reasonably be substituted under sub-clause (b) of this clause Holmbury's obligation to complete performance or the contract shall be suspended until such time as a substitute therefore can be found and becomes available. **8. LIABILITY FOR DEFECTS:** (a) If any defect is discovered in the Goods within twelve months of their delivery or the date up to which delivery could have been made to the customer, and is shown to be due solely to defective materials or workmanship or to the failure of the Goods to conform in accordance with any plans or specifications referred to in Holmbury's quotation or acceptance of order (subject to customarily accepted tolerance) then Holmbury will at its own option, either repair or replace the defective part or parts of the Goods (or will allow the Customer credit for the price paid in respect of the Goods), and Holmbury will make no charge for any such repair or replacement. These conditions shall apply to repaired or replaced parts. (B) The undertaking given in sub-clause (a) of this clause is subject to the provisions of Clause 9 and 10 below and to the following conditions: (i) That the Customer shall return the defective part or parts of the Goods to Holmbury's works (or to such other place as Holmbury may specify), as soon as after discovery of the defect as is reasonably practicable, and in any event not later than 28 days after discovery of the defect; (ii) That the cost of transporting the defective part or parts of the Goods to and from Holmbury's works shall be paid by the Customer; (iii) That the Customer shall give written notice to Holmbury specifying the nature of the defects in the part or parts of the Goods so returned; (iv) That the Goods had been used and maintained properly and carefully and in accordance with any instruction issued by Holmbury. (C) The undertaking contained in sub-clause (a) does not apply to goods or any part of goods not manufactured by Holmbury. In the case of such goods, Holmbury will use its best endeavours to pass on to the Customer the benefit of any guarantee, condition, warranty or servicing arrangement received by Holmbury from the manufacturer of such goods, but Holmbury shall be under no liability whatsoever, for any defect in such goods. (D) In the case of a part or parts being replaced under the provisions of this clause, the original of such part or parts shall become the property of Holmbury without payment. (E) Save as above provided, Holmbury shall be under no liability by reason of the manufacture, sale or delivery of any goods which do not comply with or have not been made to comply with, the specification or description applicable to this contract, and the Customer accepts Holmbury's obligation above in lieu of any remedy or right he might otherwise have in respect of such delivery, notwithstanding that failure to provide goods which comply with the contract, or which have been made so to comply, be due to negligence on the part of Holmbury, its servants, agent, sub-contractors or others. **9. EXCLUSIONS:** (a) subject to clause 8 hereof, all conditions and warranties in respect of the Goods relating to quality, fitness for purpose, merchantability or otherwise, whether implied by statute or by common law or otherwise, are hereby excluded. (B) Without prejudice to the generality of the foregoing, any warranty or condition as to performance or suitability for any particular purpose of the Goods, and in particular any warrant or condition that the specification design or other details of the Goods will meet any particular requirement of any national or local authority or regulations or bye-laws affecting the same, except as agreed in writing with the customer, in respect of any such requirements regulations or bye-laws notified to Holmbury by the Customer on or before the making of the contract is hereby excluded. **10. PRODUCT LIABILITY AND CONSEQUENTIAL LOSS:** (a) The Customers will, on or before delivery of the Goods as herein provided, if so requested by Holmbury, enter into a written undertaking to take such steps as may be specified to the Customer by Holmbury, and set out in such undertaking relating to the safe and proper use of the Goods, without risk to health. The Customer shall indemnify Holmbury in respect of any liability, monetary penalty, or fine in respect of, or in connection with, the Goods incurred by Holmbury under the Health and Safety at Work Act 1974 or any statutory modification or re-enactment thereof or any regulations orders or directions made thereunder. (B) In no circumstances, whatsoever shall Holmbury be liable in contract or tort or otherwise for any consequential or indirect damage or loss, howsoever caused. **11. DAMAGES:** In the event, Holmbury's liability to the customer in respect of the consequences of any breach or non-performance of this contract however caused or arising, shall be limited to the price of the goods. **12. DRAWINGS, DESCRIPTION, ETC.:** All drawings, photographs, illustrations, specifications, performance data, dimensions, weights and all the like, whether contained in the contract or made by way of representation, have been provided by Holmbury in the belief that they are as accurate as reasonably possible, but they do not constitute a description of the Goods, shall not be taken to be representations made by Holmbury, and are not warranted to be accurate. **13. TERMINATION OF THE CONTRACT:** (a) Without prejudice to any other rights which Holmbury may have, Holmbury shall be entitled, on giving written notice to the Customer, to determine any contract forthwith demand immediate payment of any amount due or accruing due to Holmbury thereunder, and to retain any deposits if any of the following circumstances occur: (i) The Customer, not being a body corporate, becomes bankrupt or compounds or makes any arrangements with his creditors or commits any act of bankruptcy; (ii) The Customer, being a body corporate goes into liquidation whether compulsory or voluntary (save for the purpose of reconstruction or amalgamation) or has a receiver appointed, of its undertaking or assets or any part thereof. (B) On termination of the contract by Holmbury under sub-clause (a) of this clause, Holmbury shall have a general lien over all materials and property belonging to the Customer, which are in the possession of Holmbury for any sum due under, or in connection with, this contract or any other contract. Holmbury shall be entitled to sell such materials or property and to re-sell the Goods. **14. FORCE MAJEURE:** In the event of any delay affecting the performance of this contract by reason of any cause arising from, or attributable to acts, events, the non-occurrence of events, omissions or other accidents or matters beyond the reasonable control of Holmbury, including but not limited to the following matters, whether affecting Holmbury's own operation or those of any supplier, sub-contractor or transport contractor: (i) Strikes, lockouts or any other labour disputes (regardless of the reasonableness of the demands of labour or management's or shortage of labour); (ii) Civil commotion, riots, invasion, war or warlike state (Whether war be declared or not) or the breaking off of diplomatic relations or sabotage; (iii) Fire, explosion, storm, flood, earthquake, fog, subsidence, epidemics; (iv) Voluntary or mandatory compliance with any directions or order of any person having or appearing to have authority of the Government, whether local or national, for defence or other statutory or national purposes; (v) Inability, difficulty or delay in obtaining, or shortages of suitable raw materials, equipment, fuel, power, components or transportation. Holmbury shall be under no liability for loss or injury suffered by the Customer thereby; and the contract shall be suspended during such delay, upon the cessation of the cause of the delay, the contract shall again become operative, provided that, if as a result of such delay, a modification of the terms of the contract or cancellation thereof is requested by one party, and it is reasonable that such modification or cancellation should be made, the contract shall be so modified or cancelled, and in the case of cancellation a proper proportion of the price shall be paid for any expenditure incurred by Holmbury or any benefit conferred upon the Customer. **15. INDUSTRIAL PROPERTY:** The Customer shall indemnify Holmbury from all claims, demands, damage, penalties, costs, expenses or liability in respect of the infringement of any letters patent, registered design, design copyright, copyright or other industrial property right or breach of confidence (not being a breach by Holmbury), resulting from or arising in the performance of this contract or of any contract in accordance with the terms of this contract. Holmbury does not warrant that the supply or use of the Goods in the United Kingdom or elsewhere is not an infringement of the rights of third parties in industrial property. **16. MISCELLANEOUS:** If any of these conditions, or any part of one of these Conditions is rendered void by any legislation to which it is subject, it shall be void to the extent and no further. If any of these Conditions or any part of one of these Conditions is rendered unenforceable by any legislation to which it is subject, it shall be enforceable to the extent that it is not a fair or reasonable one to be included but no further. **17. LEGAL CONSTRUCTION:** Unless otherwise agreed in writing, this contract shall in all respects be construed and governed by the Law of England, and the Customer submits to the jurisdiction of the Courts of England.
